Box Office, 1948 *The Optimist* Keach Hagey, 2025-05-20. Excellent and deeply reported. Tim Wu, New York Times Book Review. The first major biography of tech's newest titan; this sets a high bar for those to follow. Publishers Weekly starred review. An exemplary blend of biography, financial technology reportage, and futurology. Kirkus starred review. From an acclaimed Wall Street Journal reporter comes the first biography of the enigmatic leader of the AI revolution, charting his ascent within the tech world as well as his ambitions for this powerful new technology. On November 30, 2022, OpenAI released ChatGPT, a chatbot that captivated the world with its uncanny ability to hold humanlike conversations. Not even a year later, on November 17, 2023, Sam Altman, the CEO of OpenAI, was summarily fired on a video call by the company's board. The firing made headlines around the globe. OpenAI is the leader in the race to build AGI (artificial general intelligence), or AI that can think like a human being, and Altman is the most prominent figure in the field. Yet it was mere days before Altman was back running the company he had co-founded with most of the directors who voted to fire him; themselves removed from the board. The episode was a demonstration of how quickly the industry is moving and of Altman's power to bend reality to his will. In *The Optimist*, the Wall Street Journal reporter Keach Hagey presents the most detailed account yet of Altman's rise from his precocious childhood in St. Louis to his first failed startup experience, his time as legendary entrepreneur Paul Graham's protégé and successor as head of Y Combinator, the startup accelerator where Altman became the premier power broker in Silicon Valley, the founding of OpenAI, and his recruitment of a small yet superior team and his struggle to keep his company at the cutting edge while fending off determined rivals, including Elon Musk, a former friend and now Altman's bitter opponent. Hagey conducted more than 250 interviews with Altman's family, friends, teachers, mentors, co-founders, colleagues, investors, and portfolio companies, in addition to spending hours with Altman himself. The person who emerges in her portrait is a brilliant dealmaker with a love of risk who believes in technological progress with an almost religious conviction, yet who sometimes moves too fast for the people around him. With

both the promise and peril of AI increasing by the day Hagey delivers a nuanced balanced revelatory account of the individual who is leading us into what he himself has called the intelligence age Altman is a figure out of Isaac Asimov or Neal Stephenson Or he is the author himself if it feels as though we have all collectively stepped into a science fiction short story it is Altman who is writing it The Billboard ,1929 *Democratization of Expertise* Ron Fulbright,2020-10-26 We create technology enabling us to do things never before possible and it ultimately changes the way we live work play and interact with each other Throughout human history the democratization of technology making a technology available to the masses has brought about sweeping cultural social political and societal changes In the last half century the democratization of computers information the Internet and social media have revolutionized and transformed our lives We now stand at the beginning of a new era sure to bring about waves of new revolutions the cognitive systems era Until now humans have done all of the thinking However our lives are about to be infused with artificial entities capable of performing high level cognitive processing previously possible only in the human mind Systems capable of this kind of synthetic cognition will achieve and surpass the level of human experts in almost every field of endeavor Far from replacing humans these cognitive systems will be our collaborators teachers confidants colleagues and companions The future will belong to those who can better partner with these cognitive systems Made available to the average person via the Internet handheld devices and through ordinary objects all around us expertise will become democratized Everything will change when anyone has access to expertise in any field and new things will be possible The democratization of expertise is the foundation on which our society s revolutions will be built over the next half century This book discusses societal and cultural revolutions throughout history brought about by the adoption of new technology and gives brief histories of human cognitive augmentation and artificial intelligence In the coming cognitive systems era humans by collaboratively partnering with cognitive systems will together achieve expert level performance synthetic expertise with humans performing some of the cognitive processing and cognitive systems performing some As the capabilities of cognitive systems improve over time the balance of thinking will shift from being mostly human to mostly artificial This book introduces the Levels of Cognitive Augmentation to describe this shift Drawing from previous research in cognitive systems and intelligent agent theory the knowledge stores required for expertise are identified in a Knowledge Level description of expertise This book introduces a new abstract level called the Expertise Level to describe the skills needed for expertise Combining the knowledge level and expertise level descriptions this book introduces the Model of Expertise This book demonstrates use of the Model of Expertise by presenting several synthetic expert architectures a synthetic teacher Synthia a synthetic friend therapist Sy a synthetic elderly companion Lois a synthetic research companion Synclair and an automated scientific hypothesis explorer Ashe This book is intended for anyone interested in the fields of cognitive systems cognitive computing cognitive augmentation or artificial intelligence or the impact of technologies from these fields on society Anyone doing research and development in the area of cognitive systems or artificial intelligence will
