Invisible Rulers Renée DiResta, 2024-06-11 An essential and riveting Jonathan Haidt account of the small communities of propagandists revolutionizing politics culture and society Invisible Rulers is about a profound transformation in power and influence that is altering our politics our local government and even our relationships with friends and neighbors Today small communities of propagandists increasingly shape public opinion and even control our relationship to the truth Our shared reality has splintered into discrete bespoke realities driven by algorithms influencers and curated content Very little can bridge the divide thereby making democratic consensus nearly impossible to achieve Ren e DiResta exposes how these propagandists and their followers undermine the institutions that make society work from anti vaccine zealots who flood social media with fringe viewpoints to influencers who use AI generated images to manipulate our perception of reality She also provides readers with a new conception of civics that helps us understand and fight back against these new invisible rulers

Meganets David B. Auerbach, 2023-03-14 How the autonomous digital forces jolting our lives as uncontrollable as the weather and plate tectonics are transforming life society culture and politics David Auerbach s exploration of the phenomenon he has identified as the meganet begins with a simple startling revelation There is no hand on the tiller of some of the largest global digital forces that influence our daily lives from corporate sites such as Facebook Amazon Google YouTube Instagram and Reddit to the burgeoning metaverse encompassing cryptocurrencies and online gaming to government systems such as China s Social Credit System and India s Aadhaar As we increasingly integrate our society culture and politics within a hyper networked fabric Auerbach explains how the interactions of billions of people with unfathomably large online networks have produced a new sort of beast ever changing systems that operate beyond the control of the individuals companies and governments that created them Meganets Auerbach explains have a life of their own actively resisting attempts to control them as they accumulate data and produce spontaneous unexpected social groups and uprisings that could not have even existed twenty years ago And they constantly modify themselves in response to user

behavior resulting in collectively authored algorithms none of us intend or control These enormous invisible organisms exerting great force on our lives are the new minds of the world increasingly commandeering our daily lives and inner realities Auerbach's analysis of these gargantuan opaque digital forces yield important insights such as The conventional wisdom that the Googles and Facebook of this world are tightly run algorithmic entities is a myth No one is really in control The efforts at reform to get lies and misinformation off meganets run into a brick wall because the companies and executives who run them are trapped by the persistent evolving and opaque systems they have created Bitcoin and other cryptocurrencies are uncontrollable and their embrace by elite financial institutions threatens the entire economy We are asking the wrong questions in assuming that if only the Facebooks of this world could be better regulated or broken up that they would be better more ethical citizens Why questions such as making algorithms fair and bias free and whether AI can be a tool for good or evil are wrong and misinformed Auerbach then comes full circle showing that while we cannot ultimately control meganets we can tame them through the counterintuitive measures he describes in detail

Making Business Of Social Media Raymond Wayne, 2018-11-10 Imagining the Future Social media has brought people together in ways that were unimaginable just a decade or so ago enabling us to forge or rekindle personal connections while presenting affordable possibilities to expand branding credibility and influence on a global level Many businesses large and small are still catching up with technology looking for ways to leverage these new opportunities and develop strategies to harness social media's potential to achieve their marketing goals It's a safe bet that social media platforms will continue to innovate and evolve The companies poised to make the most of those changes will be ones with flexible strategies that can adapt as tools and user behaviour shifts Five year plans are meaningless in the face of disruptive technology that is far from technological maturity If you want to make the most of social media you're going to need to learn to go with the flow No one can predict the next social media breakthrough Yet it's possible to make some educated guesses based on emerging trends and technology These shifts may have negligible impact on the way some businesses use social media and present enormous opportunities for others It will be up to you to watch for new platforms and capabilities and see the possibilities they offer yet here this book has already brought all readers to the Forefront of Social Media Advancement
