Biohackers Magazine Issue 11 Biohackers , The world and the humans share a special bond together The world is a place full of vibrant life unpredictable events and a sort of beautiful self sustaining chaos The Human being's journey on this Earth is one that is corporeal yet also deeply spiritual The world presents so many things into our lives that often we forget that we are more than just what invokes responses from our physical senses What separates man from every other creature is his ability to think rationally What man lacks in survival endowments such as long claws fur etc man makes up for in his ability to know Man can think and know that he thinks Man can eat and know that he eats Man can speak and know that he

speaks The human being is able to conquer and have dominion over the creatures and the world itself because of this unique ability to know rationally There are many different areas where the human being shows this separation of pure intellect One would be his tool making ability or homo Faber It is true that some monkeys can make tools but it is the only man that makes these tools not just as an extension of their bodily reach but as direct fruition of their thoughts Community Language Science Arts Religion Death and Culture are all elements that show man s rationality his intellect The intellect exists in the soul of man and animates the body through the influence on man s free will Too often we focus on the superficial parts of ourselves and get lost in the mainstream s constant influential assault about how we should be physical While of course we are composed of the body we must remember that it is the soul that also makes up our life and its health must also be taken into consideration in everything we do We can define a human being as a rational animal a composite of both body and soul Its soul is the subsistent element and its powers involve the knowing intellect and the will to do good With free will aiming toward good and knowledge aiming towards the truth the human being works towards becoming more beautiful in the sense of intentionality of culture Biohacking in its deepest sense must look beyond the temporal world of physiological and temporal matter and adhere to the health and the growth of the human soul We are all on this Earth together and as biohackers we have the mission of increasing our knowledge every single day to feed not only our bodies and brains but most importantly our souls When one chooses to take the time to explore such questions as who they are and how they act and where they are going and what is their purpose they increase their value as a person through this continual development Their soul becomes more of a master over their temporal body and they can live life with perhaps more peace and happiness because of their continued growth and development of their soul which acts through their body [Why Won't You Sleep?!](#) Macall Gordon, Kim West, MSW, 2024-11-19 Have you tried everything to get your child to sleep and nothing has worked You are not alone Researcher and sleep coach Macall Gordon and the Sleep Lady Kim West offer a tried and true approach to shifting sleep behavior that actually works even when nothing else has A tsunami of modern sleep training methods promise easy and quick results and for many parents and children these methods work as intended However there is a large exhausted group of parents whose children have sleep problems that are not responsive to those crying based methods These children tend to be more reactive persistent and perceptive than their peers And when it comes to sleep little ones with this kind of temperament put up a much much bigger fight They need a different approach That s where Why Won t You Sleep comes in Based on extensive research and proven methods used with thousands of families just like yours this guide gives you strategies tailored to your child s unique temperament Readers will learn Why popular sleep training techniques don t work for some children The strengths and challenges of your child s temperament traits Simple changes to your child s routine and environment that set you up for success How to create a plan for your child using the time tested approach that doesn t require leaving anyone alone to cry Tips tricks and workarounds for bedtime shenanigans night wakings co sleeping
