German Medical Data Sciences 2021: Digital Medicine: Recognize - Understand - Heal Tim Beißbarth,Jochem König,Claudia Ose,Geraldine Rauch,Ulrich Sax,Björn Schreiweis,2021-10-15 Digitization offers great potential especially in medicine Cross domain and cross institutional linkage big data artificial intelligence and robotics can all help to improve research and care but they also pose new challenges to all those involved

This book presents the joint proceedings of the GMDS German Medical Data Sciences and TMF its Technology Methodology and Infrastructure platform held entirely online from 26-30 September 2021 as a result of restrictions due to the Coronavirus pandemic. This joint event addresses the opportunities and risks of using new information technologies in medicine as well as the resulting requirements for data protection, data security, and ethics. Methodological challenges associated with the preparation, evaluation, and interpretation of data volumes which constantly increase in type and scope in the course of digitization are also examined in detail. The 25 papers included here are divided into 5 sections: editorials, artificial intelligence, and clinical decision support systems, CDSS, data integration and interoperability, human-computer interaction, and software systems and frameworks. The topics covered are very diverse, ranging from disease detection using retinal imaging through data management and sharing to interactive web applications. Providing an overview of regional research and developments in the field, the book will be of interest to all those working in health technology and medical informatics, researchers and practitioners alike.
