You: For Sale Stuart Sumner, 2015-08-20 Everything we do online and increasingly in the real world is tracked logged analyzed and often packaged and sold on to the highest bidder Every time you visit a website use a credit card drive on the freeway or go past a CCTV camera you are logged and tracked Every day billions of people choose to share their details on social media which are then sold to advertisers The Edward Snowden revelations that governments including those of the US and UK have been snooping on their citizens have rocked the world But nobody seems to realize that this has already been happening for years with firms such as Google capturing everything you type into a browser and selling it to the highest bidder Apps take information about where you go and your contact book details harvest them and sell them on and people just click the EULA without caring No one is revealing the dirty secret that is the tech firms harvesting customers personal data and selling it for vast profits and people are totally unaware of the dangers You For Sale is for anyone who is concerned about what corporate and government invasion of privacy means now and down the road The book sets the scene by spelling out exactly what most users of the Internet and smart phones are exposing themselves to via commonly used sites and apps such as facebook and Google and then tells you what you can do to protect yourself The book also covers legal and government issues as well as future trends With interviews of leading security experts black market data traders law enforcement and privacy groups You For Sale will help you view your personal data in a new light and understand both its value and its danger Provides a clear picture of how companies and governments harvest and use personal data every time someone logs on Describes exactly what these firms do with the data once they have it and what you can do to stop it Learn about the dangers of unwittingly releasing private data to tech firms including interviews with top security experts black market data traders law enforcement and privacy groups Understand the legal information and future trends that make this one of the most important issues today

Computers Today & Tomorrow □ 7 Meera Aggarwal, Dorothy Fanthome, COMPUTERS TODAY TOMORROW series consists of eight computer science textbooks for classes 1 8 This series is created to help students master the use of various kinds of software and IT tools The books have been designed to keep pace with the latest technologies and the interests of the 21st century learners The series is based on Windows 7 and MS Office 2007 and adopts an interactive approach to teach various concepts related to Computer Science The books for classes 1 5 are introductory They introduce students to the basic features of Windows 7 and MS Office 2007 starting with the history of computers what are the basic parts of the computer how to use Tux Paint WordPad MS Paint how to program in LOGO and also give an introduction to the Internet However the books for classes 6 8 are for senior students and take a deep dive into the advanced features of Windows 7 and MS Office 2007 including how to do programming in QBasic HTML and Visual Basic Students learn to create animations using Flash and Photoshop and how to communicate using the Internet The ebook version does not contain CD

Boot-Click-Enter □ 8 Gurpreet Bindra, Boot Click Enter Enter the world of IT based on

Windows 7 and MS Office 2010 comprises of eight computer science textbooks for classes 1-8. The CCE compliant series is based on an interactive approach to teach various concepts related to Computer Science. This series is created to help students master the use of various kinds of software and IT tools. The books have been designed to keep pace with the latest technologies and the interests of the 21st century learners. The books for classes 1-5 are introductory. They introduce students to the basic features of Windows 7 and MS Office 2010 starting with the history of computers, what are the basic parts of the computer, how to use Tux Paint, WordPad, MS Paint, how to program in LOGO and also give an introduction to the Internet. However, the books for classes 6-8 are for senior students and take a deep dive into the advanced features of Windows 7 and MS Office 2007 including how to do programming in QBasic, HTML and Visual Basic. Students learn to create animations using Flash and Photoshop and how to communicate using the Internet. The ebook version does not contain CD.
