Public Scholarship in Communication Studies Thomas J. Billard,Silvio Waisbord,2024-03-26 Prometheus brought the gift of enlightenment to humanity and suffered for his benevolence This collection takes on scholars Promethean view of themselves as selfless bringers of light and instead offers a new vision of public scholarship as service to society

Thomas J Billard and Silvio Waisbord curate essays from a wide range of specialties within the study of communication. Aimed at scholars and students alike, the contributors use approaches from critical meditations to case studies to how-to guides as they explore the possibilities of seeing shared knowledge not as a gift to be granted but as an imperative urging readers to address the problems of the world. Throughout the volume, the works show that a pivot to ideas of scholarship as public service is already underway in corners of communication studies across the country.

Visionary and provocative: Public Scholarship in Communication Studies proposes a needed reconsideration of knowledge and a roadmap to its integration with community. Contributors: Elaine Almeida, Becca Beets, Thomas J Billard, Danielle K Brown, Aymar Jean Christian, Stacey L Connaughton, Paula Gardner, Larry Gross, Amy Jordan, Daniel Kreiss, Rachel Kuo, Susan Mancino, Shannon C McGregor, Philip M Napoli, Todd P Newman, Srividya Ramasubramanian, Chad Raphael, Sue Robinson, Silvio Waisbord, Yidong Wang, and Holley Wilkin. [The Complete Guide to Open Scholarship](#) Victoria Martin, 2022-05-24. Choice Outstanding Academic Title 2023. Offers librarians an authoritative overview of the full spectrum of significant issues and controversies related to open scholarship in a candid and fair-minded manner. There has long been a debate about openness in scholarship, and even the term itself continues to be debated. Openness is a complex and multidimensional concept, and its nature in scholarship continually evolves. One of the hindrances to the transition to greater openness in academia is this lack of clear understanding about how it fits into the practice of scholarly communication. To ensure that librarians as knowledge managers can better educate scholars about the benefits and challenges of open scholarship, Victoria Martin's *The Complete Guide to Open Scholarship* brings clarity to the concept of openness, tests assumptions concerning it, and strikes the right balance between breaking down complex ideas into simpler ones and honoring the reader's intelligence and previous knowledge of the subject. Readers will learn the history of openness in scholarship as well as several ways in which openness can be perceived. Drawing on specific examples, Martin discusses the most prominent scholarly models based on openness, barriers to openness, concerns about openness in scholarship, and the future of open scholarship.

Public Scholarship in Literary Studies Rachel Arteaga, 2021-05-21. *Public Scholarship in Literary Studies* demonstrates that literary criticism has the potential not only to explain but to actively change our terms of engagement with current realities. Rachel Arteaga and Rosemary Johnsen bring together accomplished public scholars who make significant contributions to literary scholarship, teaching, and the public good. The volume begins with essays by scholars who write regularly for large public audiences in primarily digital venues, then moves to accounts of research-based teaching and engagement in public contexts, and finally turns to important new models for cross-institutional partnerships and campus community engagement. Grounded in scholarship and written in an accessible style, *Public Scholarship in Literary Studies* will appeal to scholars in and outside the academy, students, and those interested in the public humanities. There are books of literary criticism that attempt to reach crossover audiences, but none that take this particular public humanities-focused on literary criticism perspective. Kathryn

Disinformation and Data Lockdown on Social Platforms Shawn Walker, Dan Mercea, Marco Bastos, 2021-12-26 This book addresses the question of how researchers can conduct independent ethical research on mal mis and disinformation in a rapidly changing and hostile data environment The escalating issue of data access is thrown into sharp relief by the large scale use of bots trolls fake news and strategies of false amplification the effects of which are difficult to quantify due to a corporate environment favouring platform lockdowns and the restriction of access to Application Programming Interfaces APIs As social media platforms increase obstacles to independent scholarship by dramatically curbing access to APIs researchers are faced with the stark choice of either limiting their use of trace data or developing new methods of data collection Without a breakthrough social media research may go the way of search engine research in which only a small group of researchers who have direct relationships with search companies such as Google and Microsoft can access data and conduct research The chapters in this book were originally published as a special issue of the journal Information Communication Society
