Tips To Follow The 30-Day Walking Plan

1. Slow is a stroll - approx 25 minutes/mile. Use this easy pace to warm up.
2. Moderate is a normal walking pace - 20 minutes/mile. You can still talk as you walk.
3. Fast is walking at a brisk pace where you're pushing yourself - 17 minutes/mile.
4. Complete sessions in one go or split into 2
5. Repeat a week if you find it too hard.
6. If the plan is too easy increase the intensity of your walks with intervals or hills.

Bowling Alone: Revised and Updated Robert D. Putnam, 2020-10-13 The basis for the documentary Join or Die now streaming on Netflix Updated to include a new chapter about the influence of social media and the Internet the 20th anniversary edition of Bowling Alone remains a seminal work of social analysis and its examination of what happened to our sense of community remains more relevant than ever in today s fractured America Twenty years ago Robert D Putnam made a seemingly simple observation once we bowled in leagues usually after work but no longer This seemingly small phenomenon symbolized a significant social change that became the basis of the acclaimed bestseller Bowling Alone which The Washington Post called a very important book and Putnam the de Tocqueville of our generation Bowling Alone surveyed

in detail Americans changing behavior over the decades showing how we had become increasingly disconnected from family friends neighbors and social structures whether it s with the PTA church clubs political parties or bowling leagues In the revised edition of his classic work Putnam shows how our shrinking access to the social capital that is the reward of communal activity and community sharing still poses a serious threat to our civic and personal health and how these consequences have a new resonance for our divided country today He includes critical new material on the pervasive influence of social media and the internet which has introduced previously unthinkable opportunities for social connection as well as unprecedented levels of alienation and isolation At the time of its publication Putnam s then groundbreaking work showed how social bonds are the most powerful predictor of life satisfaction and how the loss of social capital is felt in critical ways acting as a strong predictor of crime rates and other measures of neighborhood quality of life and affecting our health in other ways While the ways in which we connect or become disconnected have changed over the decades his central argument remains as powerful and urgent as ever mending our frayed social capital is key to preserving the very fabric of our society
