The Platform Society José van Dijck, Thomas Poell, Martijn de Waal, 2018-10-02 Individuals all over the world can use Airbnb to rent an apartment in a foreign city check Coursera to find a course on statistics join PatientsLikeMe to exchange information

about one's disease hail a cab using Uber or read the news through Facebook's Instant Articles. The promise of connective platforms is that they offer personalized services and contribute to innovation and economic growth while bypassing cumbersome institutional or industrial overhead. In *The Platform Society*, Van Dijck, Poell, and De Waal offer a comprehensive analysis of a connective world where platforms have penetrated the heart of societies, disrupting markets and labor relations, circumventing institutions, transforming social and civic practices, and affecting democratic processes. This book questions what role online platforms play in the organization of Western societies. First, how do platform mechanisms work, and to what effect are they deployed? Second, how can platforms incorporate public values and benefit the public good? *The Platform Society* analyzes intense struggles between competing ideological systems and contesting societal actors: market, government, and civil society, raising the issue of who is or should be responsible for anchoring public values and the common good in a platform society. Public values include, of course, privacy, accuracy, safety, and security, but they also pertain to broader societal effects such as fairness, accessibility, democratic control, and accountability. Such values are the very stakes in the struggle over the platformization of societies around the globe. *The Platform Society* highlights how this struggle plays out in four private and public sectors: news, urban transport, health, and education. Each struggle highlights local dimensions, for instance, fights over regulation between individual platforms and city governments, but also addresses the level of the platform ecosystem as well as the geopolitical level where power clashes between global markets and supra-national governments take place.

Museum Flack Steve Lott, 2025-09-04. In recent years, museums have found themselves on the front pages for all the wrong reasons. News coverage, once reserved for exciting exhibits or landmark donations, now shines a harsh spotlight on controversies, leadership disputes, funding flaws, political orders, and an array of reputational crises. Two-thirds of museum leaders report feeling unprepared when facing journalists, with many describing their first media crisis as overwhelming and damaging. These stories, broadcast to national audiences, shape public perceptions in minutes, sometimes undoing years of careful work. The heart of the issue lies in a critical and often overlooked gap: while museum directors typically master museum administration, curatorial, or educational work, few possess the training or experience needed to respond to relentless media scrutiny. Nearly every museum, from the largest institution to local history centers, struggles with limited resources. This gap has led to missed opportunities for positive news coverage and, in some cases, public misunderstandings that have hurt careers and endangered institutional trust. *Museum Flack* arrives at this moment to fill the void: an essential guide for everyone, from students entering the field to seasoned executives and board members. Drawing from lessons learned in high-stakes media campaigns in aerospace and technology and enriched by illuminating museum-specific case studies, this book lays out exactly how museum professionals can shape compelling narratives for the media. Turn crisis moments into opportunities for trust building. Secure positive national news coverage with thoughtful planning, not enormous budgets. Confidently navigate the modern media landscape, from newspapers to TikTok. *Museum Flack* unpacks the techniques behind

headlines and empowers any museum professional to advocate for their institution safeguard its reputation and seize the media spotlight for all the right reasons Every chapter offers step by step tactics and real world examples transforming complex communications challenges into clear actionable strategies The time to master museum public relations is now Readers who embrace these lessons will champion their institutions protect their legacies and help museums thrive even under the sharpest media lens **Adolescent Use of New Media and Internet Technologies** Gordon P. Ingram,2023-03-31 This book engages with contemporary and often polarizing debates surrounding the risks of adolescent use of digital media and internet technologies By drawing on multiple research studies the text synthesizes current understandings of the impacts of social network use online gaming pornography and phenomena including cyberbullying cyberstalking and internet addiction to develop recommendations for the effective identification of at risk youth as well as strategies for informed communication about online risks and opportunities It shows how media discussion of risks to children and teenagers from new technology is highly emotive and often exaggerated rooted in the moral panic surrounding new cultural practices that young people engage in but which adults do not understand Online risks are thus conceptualized as centering on three areas specific to adolescence which have undergone radical changes due to new internet technology These include young people s identity the types of content that are accessed and social relationships The author shows how these matters stem from the potential of new technology to establish new interpersonal connections emphasizing how it brings opportunities as much as risks As such he provides a uniquely balanced discussion of potential dangers while also emphasizing the opportunities for social academic and personal growth which new technologies afford young people It will be indispensable for researchers and clinicians interested in assessing levels of online risk as well as scholars and educators with interests in cyberpsychology social psychology cyber culture social aspects of computing and media and adolescent development *Working With Words* Brian S. Brooks,James L. Pinson,Jean Gaddy Wilson,2019-07-12 Regardless of the

medium from print to broadcast to PR to digital *Working with Words* has you covered With a focus on improving skills in both grammar and style this book serves as an invaluable reference for students throughout their academic and professional careers Helping students become better journalists and media writers the text combines news writing acumen with good journalistic form covering the full spectrum of writing skills from understanding basic methods of style and writing to mastering English grammar and mechanics *Flagships or phase-out models for climate change communication? An*

analysis of the effects of climate change imagery on the audience Jana Mengede,2021-12-23 Master s Thesis from the year 2021 in the subject Communications Mass Media grade 1 2 SRH Mobile University language English abstract As climate change is a development that happens slowly and is widely invisible many photographers have made it their mission to visualize its causes and impacts on society Since the early 2000s they have established visual synecdoches by using repetitive formulas for their images to show the vulnerability of natural and human systems Whereas such repetition creates awareness

and recognition within society still there is also criticism that any attempt to visualize climate change often leads to the same representations of melting ice Polar Bears or natural disasters The purpose of this work is to find out which repetitive motives are used by the media and how these motives affect the people By means of a mixed method approach it examines if the flagships of climate change imageries such as the polar bear still promote salience to the audience and if images of climate change solutions evoke positive feelings and can therefore be considered as motivating In order to answer the question which climate change imageries are used by the media a quantitative analysis of image types according to Grittmann and Ammann is conducted This analysis shows that there are leading motives which are repetitively used as visualizations to accompany online news reports among them mainly images of causes smokestacks and impacts wildfire ice imagery and extreme weather The media rarely report on climate change solutions In a second step a sample of ten images of these leading motives is selected for the explorative research of image effects By means of the Visual Communication Process Model M ller Kappas and Olk it examines how people visually perceive these images how they understand and interpret them and what emotions they cause The effects are measured with a self administered online questionnaire The results of the survey reveal that the repetition of motives and the use of flagships does not lead to climate fatigue Anyway there is only one solution imagery that clearly verifies the positive effects on the self efficacy level of the audience Although such imageries receive attention on social media they have not reached the mass media so far which could serve as a starting point for future research
