Flexible emission fees Magnus Enell,Nordic Council of Ministers,2012-04-17 This report explores the urgent question of how to transition to a green economy If the price of pollution becomes the same as the price to not pollute i e the investment required for a non polluting solution could market forces be harnessed to create a totally green economy Would the consumer lead the way if pollution fees were simply credited into everyone s account Would economic growth and technical development forge ahead Taking the flexible fee mechanism proposed by H glund as a starting point the report examines the academic literature and presents the results of a workshop where leading Swedish economists and environmentalists examine the issues involved in price discovery mechanisms and call for further developments in this field

Flexible Automation in Developing Countries Ludovico Alcorta,2003-09-02 This book examines the extent of and motives for the diffusion of flexible automation FA at global level and then turns to the local and firm level bringing together in depth studies of sixty two firms in Brazil India Mexico Thailand Turkey and Venezuela Research focuses on the impact of computer numerically controlled machine tools on scale and scope by exploring changes in lot sizes and product variety product scale and scope total plant output plant scale and total firm output firm scale Barriers to setting up FA based operations are discussed as are factors which may affect a decision to locate in a developing country The contributed studies reveal a relatively slow diffusion of FA in developing countries and it is demonstrated that while FA possibly increases scope it also requires that plant output be increased in order to maintain efficiency Alcorta concludes that the location in developing countries will probably only be viable for large domestic firms multinationals seeking to relocate simple but labour intensive assembly processes and firms in countries with significant domestic markets This work is unique in addressing the scale and scope issues in developing countries and in the wealth of information regarding machine tools which it provides The data provided in the appendix includes official United Nations data previously unpublished This will be of use for all research into trends in the use of machine tools

The Flexible Enterprise Sushil,Edward A. Stohr,2013-11-19 The need for enterprise flexibility in an era of rapidly advancing technology increasing competition and globalization is apparent Flexibility can be thought of as an ability of the enterprise to quickly and efficiently respond to market changes and to bring new products and services quickly to the market place Beyond this definition a truly flexible enterprise should proactively change the market through its ability to create new and innovative products and services The proposed book is intended to provide a conceptual framework of Flexible Enterprise supported by researches case applications in various types of flexibilities exhibited by a flexible enterprise The selected papers from a variety of issues concerning the planning and operation of a flexible enterprise

are organized into following four parts I Enterprise and Strategic Flexibility II Organizational Flexibility III Business Process and Information Systems Flexibility IV Operations Flexibility

Design for Manufacturability David M. Anderson, 2020-05-11 Achieve any cost goals in half the time and achieve stable production with quality designed in right the first time Design for Manufacturability How to Use Concurrent Engineering to Rapidly Develop Low Cost High Quality Products for Lean Production is still the definitive work on DFM This second edition extends the proven methodology to the most advanced product development process with the addition of the following new unique and original topics which have never been addressed previously These topics show you how to Cut cost from 1 2 to 1 10 in 9 categories with ways to remove that much cost from product charges and pricing Commercialize innovation starting with Manufacturable Research and learning from the new section on scalability you will learn how to design products and processing equipment to quickly scale up to any needed demand or desired growth Design product families that can be built on demand in platform cells that also mass customize products to order Make Lean production easier to implement with much more effective results while making build to order practical with spontaneous supply chains and eliminating forecasted inventory by including an updated chapter on Designing Products for Lean Production The author s 30 years of experience teaching companies DFM based on pre class surveys and plant tours is the

foundation of this most advanced design process It includes incorporating dozens of proven DFM guidelines through up front concurrent engineering teamwork that cuts the time to stable production in half and curtails change orders for ramps rework redesign substituting cheaper parts change orders to fix the changes unstable design specs part obsolescence and late discovery of manufacturability issues at periodic design reviews This second edition is for the whole product development community including Engineers who want to learn the most advanced DFM techniques Managers who want to lead the most advanced product development Project team leaders who want to immediately apply all the principles taught in this book in their own micro climate Improvement leaders and champions who want to implement the above and ensure that the company can design products and versatile processing equipment for low volume high mix product varieties Designing half to a tenth of cost categories can avoid substituting cheap parts which degrades quality and encourages standardization and spontaneous supply chains which will encourage Lean initiatives Using cellular manufacturing to shift production between lines for mixed production of platforms and build to order to offer the fastest order fulfillment can beat any competitors delivery time

Robot Reliability and Safety B.S. Dhillon,2012-12-06 Robots are increasingly being used in industry to perform various types of tasks Some of the tasks performed by robots in industry are spot welding materials handling arc welding and routing The population of robots is growing at a significant rate in various parts of the world for example in 1984 a report published by the British Robot Association indicated a robot population distribution between Japan 64 600 Western Europe 20 500 and the United States 13 000 This shows a significant number of robots in use Data available for West Germany and the United Kingdom indicate that in 1977 there were 541 and 80 robots in use respectively and in 1984 these numbers went up to 6600 and 2623 respectively Just as for other engineering products the reliability and safety of robots are important A robot has to be safe and reliable An unreliable robot may become the cause of unsafe conditions high maintenance costs inconvenience etc Robots make use of electrical mechanical pneumatic electronic and hydraulic parts This makes their reliability problem a challenging task because of the many different sources of failures According to some published literature the best mean time between failures MTBF achieved by robots is only 2500 hours This means there is definite room for further improvement in robot reliability With respect to safety there have been five fatal accidents involving robots since 1978

Manufacturing Flexible Packaging Thomas Dunn,2014-09-04 Efficiently and profitably delivering quality flexible packaging to the marketplace requires designing and manufacturing products that are both fit to use and fit to make The engineering function in a flexible packaging enterprise must attend to these dual design challenges Flexible Packaging discusses the basic processes used to manufacture flexible packaging products including

rotogravure printing flexographic printing adhesive lamination extrusion lamination coating and finishing slitting These processes are then related to the machines used to practice them emphasising the basics of machines control systems and options to minimize wasted time and materials between production jobs Raw materials are also considered including the three basic forms Rollstock paper foil plastic films Resin and Wets inks varnishes primers Guidance is provided on both material selection and on adding value through enhancement or modification of the materials physical features A measures section covers both primary material features such as tensile elongation modulus and elastic and plastic regions and secondary quality characteristics such as seal and bond strengths coefficient of friction oxygen barrier and moisture vapour barrier Helps engineers improve existing raw material selection and manufacturing processes for manufacturing functional flexible packaging materials Covers all aspects of delivering high value packaging to the customer from the raw materials to the methods of processing them the machines used to do it and the measures required to gauge the characteristics of the product Helps engineers to minimize waste and unproductive time in production **Farm Mechanics ...** Bernard Lyman Johnson,1922 Lot-Sizing and Scheduling for Flexible Flow Lines Daniel Quadt,2012-09-14 The book considers the lot sizing and scheduling problem for flexible flow line production facilities Flexible flow lines are flow lines with parallel machines on some or all production stages They can be found in a vast number of industries A three phased solution approach is presented that solves the integrated lot sizing and scheduling problem in a hierarchical manner The approach is able to handle several important features relevant in industrial practice such as back orders and setup carry over The developed solution procedures solve practically sized problems in a relatively short amount of time One of the procedures is based on a novel mixed integer programming MIP model which employs integer variables instead of binary variables This makes it possible to find near optimal solutions using standard algorithms such as CPLEX Another procedure uses two nested Genetic Algorithms An application of the framework in the semiconductor industry is given *Research & Education Networking* ,1996-07 *Freight Classification* John Frederick Strombeck,1912
