Claudio, 2015-09-04 To create a comic is not to illustrate words but to create narrative diagrams and transform strokes into imaging words The infinite array of possibilities that the merging of text and pictures provides is a garden of forking paths that critics have just started to explore This is an art that operates as the crossroads of various disciplines but whose specifications require a thorough understanding of its unique mechanisms The explosion of experimental works and the incorporation of previously marginal or nonexistent genres and themes in comics have enriched an already fruitful art in ways that continue to surprise both readers and critics This collection of essays offers a space of reflection on the cultural social historical and ideological dimensions of comics With this in the background the book focuses on three main areas the origins and definitions of comics the formal tools of the medium and authors and their works The historical and formal approach to comics as shown here is still essential and the debate about the origins and definition is still present but two thirds of this collection formulate other treatments that scholars had not started to tackle until recently Does this mean that the study of comics has finally reached the necessary confidence to abandon the artistic legitimization of the medium Or are they just new self defense mechanisms through alliances with other fields of academic interest This book will add to the debate on comics as did the international conference that led to it It provides a channel of communication with an art a two headed medium that like the god Janus operates as a hinge as a meeting point as a bridge between pictorial and literary expression Postdevelopmental Approaches to Digital Arts in Childhood Marissa McClure Sweeny, Mona Sakr, 2025-01-23

cover a wide range of topics including indigenous digital art digital drawing learning to code social media and artificial intelligence The authors use a diverse range of theoretical perspectives including posthumanism feminist new materialism social semiotics socialcultural and multimodal approaches to childhood to generate new ways of seeing the relationship between children and the digital The book includes chapters from academics and practitioners based in Australia Canada Sweden the UK and the USA and a companion website showcasing innovative and interactive material including visual essays and soundscapes
