This book explores the eventful but largely forgotten history of national planning efforts in the United States first identifying and comparing five alternative approaches to contemporary national planning then using these approaches to assess the events of 1973 1976 a period when crisis pressures brought a vigorous resurgence of national planning activity and debate Dr Wilson concludes that two new approaches to planning learning adaptive and general systems are increasingly being used in lieu of the long established and less flexible rational and incremental approaches and that these might eventually achieve a beneficial new synthesis in both federal policy practice and social science theory He argues that the twin questions of a planned versus a planning society and of who will plan for whom are inexorably emerging as key issues in U S public policy Along with its companion volume *National Planning in the United States An Annotated Bibliography* also published by Westview this book provides extensive new interdisciplinary research material and integrative perspectives on current planning challenges **The Official Record of the United States Department of Agriculture** ,1933 *Public Papers of the Presidents of the United States* United States.
