University Rankings, Diversity, and the New Landscape of Higher Education ,2019-02-18 University rankings are a relatively new phenomenon in higher education Although quite an established practice in the U S it is only within the last decade that attempts to analyse university performance have spread to the rest of the world and that we also have seen new global rankings appear rankings attempting to measure university performance beyond national borders No wonder that this trend is accompanied by a growing interest in studying rankings throughout the world This book is written as part of the effort to better understand rankings and their effects on higher education A serious approach towards university rankings implies that rankings should be analysed properly including the methods used and the indicators chosen and investigate the objectives claimed If university rankings are considered as consumer information then everyone should have an interest in basing such guidance on valid and reliable data and methodology A serious analysis should also discuss the wider implications of rankings as an emerging phenomenon in higher education Consequently the contributions to this book investigate and analyse how different rankings work how they reach their conclusions and on what data and methodology they are built Furthermore it provides a critical reflection about the impact of rankings on higher education how and in what way rankings influence policy making the structure of the sector or the internal life of the sector Kiplinger's Personal

Finance ,2009-08 The most trustworthy source of information available today on savings and investments taxes money management home ownership and many other personal finance topics *Research Handbook on University Rankings* Hazelkorn, Ellen, Mihut, Georgiana, 2021-12-10 Gathering unique and thoughtful contributions from leading international scholars this timely Research Handbook offers diverse perspectives on university rankings twenty years after the first global rankings emerged It presents an in depth analysis that reflects the current state of research on rankings their influence and impact *University Rankings* William Yat Wai Lo, 2014-02-17 This book adopts a qualitative case study approach to provide the readers with a systematic delineation and interpretation of the implications of the university ranking phenomenon for Taiwan s higher education system It reviews the literature on different theories concerning the global transformation of

higher education and presents basic information on higher education in Taiwan. The author develops a four-dimensional framework for the analysis of the ranking phenomenon in the island state. First, the technological-ecological dimension aims to look into how the rankings have impacted Taiwan's higher education based on empirical findings from five Taiwanese public universities. Next, the technological-geographical dimension examines how Taiwan can use rankings to promote its interests in global higher education. The two conceptual dimensions focus on the relationship between the rankings and power in higher education. They show how the phenomenon can be read and explained through theoretical lenses from ecological and geographical perspectives. From an ecological perspective, the empirical evidence suggests that the influence of rankings varies throughout the academic hierarchy in Taiwan. The theoretical analysis then illustrates the relationship between the ranking phenomenon and the power structure in academic hierarchy. Geographically, while the empirical analysis is based on data from Taiwan, the theoretical analysis offers essential insights that help readers to understand the changing global landscape of higher education and its implications in East Asia.

Global University Rankings and the Mediatization of Higher Education Michelle Stack, 2016-04-12. Higher Education Institutions simultaneously critique and participate in national and international rankings of universities. However, this creates a difficult situation since if universities do participate in rankings, they acquiesce to a system based in media logics that has little to do with academic norms of research. If they do not participate in the rankings, they risk losing public funding. Students and donors in an increasingly competitive and globalized environment. This book delves into the influence of journalists, business tycoons, and multinational corporations in defining what world class is and how it will be measured. Rankings provide us with a rich study for understanding how universities define, deploy, and manage their assets and liabilities in a mediatized, globalized economy.

Global Rankings and the Geopolitics of Higher Education Ellen Hazelkorn, 2016-11-18. Global rankings and the Geopolitics of Higher Education is an examination of the impact and influence that university rankings have had on higher education policy and public opinion in recent years. Bringing together some of the most informed authorities on this very complex issue, this edited collection of specially commissioned chapters examines the changes affecting higher education and the implications for society and the economy. Split into four interrelated sections, this book covers: The development of rankings in higher education; how they have impacted upon both the production of knowledge and its geography; and their influence in shaping policymaking. Overviews of the significance of rankings for higher education systems in Europe, Asia, Africa, Russia, South America, India, and North America. An analysis of rankings in relation to key concerns that pervade contemporary higher education. Examination of the role rankings are likely to play in the future directions for higher education. This is a significant scholarly work that analyses in depth an important development in higher education systems and which is likely to have an important influence upon how we understand the higher education policy-making process, past, present, and future. It provides new analysis and conceptual understanding for researchers and firm evidence for policy makers to use when addressing the value of rankings.

in measuring the quality of their institutions Besides bringing together a powerful cast of academics this book incorporates contributions from heads of important international higher education organisations from both those involved in making and also in administering key decisions This timely reflective and accessible book forms crucial reading for those studying the subject of rankings as well as the broader implications and unintended consequences of rankings on national higher education policies Extending beyond academic researchers and students this book will also be of significant interest to policymakers higher education leaders and key stakeholders

Global University Rankings and the Politics of Knowledge Michelle Stack, 2021-06-17 For many institutions to ignore your university's ranking is to become invisible a risky proposition in a competitive search for funding But rankings tell us little if anything about the education scholarship or engagement with communities offered by a university Drawing on a range of research and inquiry based methods *Global University Rankings and the Politics of Knowledge* exposes how universities became servants to the education industry and its impact Conceptually unique in its scope *Global University Rankings and the Politics of Knowledge* addresses the lack of empirical research behind university and journal ranking systems Chapters from internationally recognized scholars in decolonial studies provide readers with robust frameworks to understand the intersections of coloniality and Indigeneity and how they play out in higher education Contributions from diverse geographical and disciplinary contexts explore the political economy of rankings within the contexts of the Global North and South and examine alternatives to media driven rankings This book allows readers to consider the intersections of power and knowledge within the wider contexts of politics culture and the economy to explore how assumptions about gender social class sexuality and race underpin the meanings attached to rankings and to imagine a future that confronts and challenges cognitive environmental and social injustice

Failing Universities

Howard Karger, David Stoesz, 2024-10-31 Colleges and universities were once places where students came to learn experts intellectuals and others came to teach and where knowledge was created Today America's higher education system is severely compromised by commodification and corporatization which have transformed higher education into a marketplace This book examines the effects of these transformations providing a comprehensive critique of the problems the sector faces It outlines how higher education's commodification has impacted areas including affordability access waste hierarchical administrative structures faculty governance the college sports industrial complex and status and social mobility based on institutional prestige The authors explore alternative policy solutions and examples of systems of higher education that are both effective and cost effective They propose a forward looking agenda for structural reform that is less expensive and more educationally sound than the current model Emphasising social cohesion sustainability a respect for diversity and an understanding of democracy and democratic principles Failing Universities offers alternative solutions for US higher education to return to its basic mission

Prestige in Academic Life

Paul Blackmore, 2015-11-19 The achievement of academic excellence is inherently competitive Deliberate government policies globalisation and changes in communication technologies mean that competitiveness in the academic world is sharper than ever before At the centre of this is the seeking of prestige at all levels from the national system to the individual Prestige in Academic Life aims to increase understanding of motivation in universities by exploring the part that prestige plays for good and ill The book's focus on motivation and prestige helps to answer fundamental questions that run through much discussion on universities such as why some problems are never solved why change can be so difficult to achieve and how individuals and groups can enable it to happen Issues explored include What role does prestige play in academic life How does prestige play out in the working lives of academics students administrators and institutional leaders How can the positive aspects of prestige be encouraged and the negative ones

diminished University leaders and managers academics administrators and students indeed all who are interested in universities will find this valuable reading It will help those in leadership positions to enhance the efficiency effectiveness and wellbeing of their institutions and will support academic staff in negotiating their career path Paul Blackmore is Professor of Higher Education in the International Centre for University Policy Research Policy Institute at King s at King s College London

World University Rankings: Statistical Issues And Possible Remedies Kay Cheng Soh,2017-03-08 World university ranking started one and a half decades ago for the purpose of understanding what makes an excellent institution of higher education Subsequent to the appearance of the Academic Ranking of World Universities at the Shanghai Jiaotong University there soon emerged the QS World University Rankings and the Times Higher Education World University Rankings These three ranking systems are considered the classics as they are the fore runners although no less than ten new systems have come to the arena The various ranking systems adopt a common approach of weight and sum to process the indicator data Each system somewhat arbitrarily decides on a set of indicators and assigns different weights to these presumably reflecting their relative importance This simple and simplistic approach meets well common sense And in fact much of the discussion on world university rankings is conducted at the commonsensical level However analyses conducted in the recent years uncovered several problems of the prevalent approach spurious precision mutual compensation weight discrepancy indicator redundancy etc which render the overall scores and ranking suspect in terms of validity These are due to systems ignoring the fact that world university rankings are a form of social measurement and therefore need be seen from this perspective Moreover rankings encourage competition and in the highly competitive world of today it is natural that institutional attention is focused on the ranking results By now the original purpose of world university ranking seems to have been overshadowed and world university rankings look more like international academic contests as though they are annual sports meets This monograph collects together many articles pertaining to the identified measurement and statistical issues of world university rankings and suggests remedies to make ranking results more trustworthy

Data Cartels Sarah

Lamdan,2022-11-08 In our digital world data is power Information hoarding businesses reign supreme using intimidation aggression and force to maintain influence and control Sarah Lamdan brings us into the unregulated underworld of these data cartels demonstrating how the entities mining commodifying and selling our data and informational resources perpetuate social inequalities and threaten the democratic sharing of knowledge Just a few companies dominate most of our critical informational resources Often self identifying as data analytics or business solutions operations they supply the digital lifeblood that flows through the circulatory system of the internet With their control over data they can prevent the free flow of information masterfully exploiting outdated information and privacy laws and curating online information in a way that amplifies digital racism and targets marginalized communities They can also distribute private information to predatory entities Alarmingly everything they re doing is perfectly legal In this book Lamdan contends that privatization and tech exceptionalism have prevented us from creating effective legal regulation This in turn has allowed oversized information oligopolies to coalesce In addition to specific legal and market based solutions Lamdan calls for treating information like a public good and creating digital infrastructure that supports our democratic ideals Sustainability Assessment in Higher Education Institutions Sandra Caeiro,Ulisses Miranda Azeiteiro,2020-12-10 This Special Issue Sustainability Assessment in Higher Education Institutions provides peer reviewed research from several geographies and institutions and covering various topics with the broad objective of achieving an assessment of the effectiveness and impact of different implementation dimensions measuring and evaluating how sustainability is being applied in practice A set of nine papers covering sustainability education interdisciplinary teaching sustainable assessment governance strategies commitments and practices and social responsibility at higher education institutions contribute significantly to this area of knowledge
