Deepfakes Graham Meikle, 2022-09-22 What happens when we can no longer believe what we see Show the AI technologies that create deepfakes enough images of a celebrity or a politician and they will generate a convincing video in which that person appears to say and do things they have never actually said or done The result is a media environment in which anyone's face and image can be remixed and manipulated Graham Meikle explains how deepfakes synthetic media are made and used From celebrity porn and political satire to movie mash ups and disinformation campaigns this book explores themes of trust and consent as face swapping software becomes more common Meikle argues that deepfake videos allow for a new perspective on the taken for granted nature of contemporary media in which our capacity to remix and share content increasingly conflicts with our capacity to trust The book analyses how such videos deepen the social media environment in which the public and the personal converge and in which all human experience becomes data to

be shared Timely clear and accessibly written this is an essential text for students and scholars of media communication cultural studies and sociology as well as general readers

Images, Reality, and Digital Culture Krešimir Purgar,2025-09-30 Focusing on the moment of transition from the pictorial to the post pictorial condition this book advocates the opinion that what fundamentally distinguishes pictorial representation in Western civilization is one's ability to distinguish what the picture shows from what the picture refers to and to that extent the reality inside the picture cannot be confused with what is outside it The contributions in this book serve as kind of a missing link connecting the genealogy of traditional images with contemporary environmental visualizations in the world that in this very moment undergoes a transition into a new exciting age in which many old knowledges are rapidly becoming obsolete and new ones are seeking their legitimacy Instead of leading the reader to reconciliation with the fatal diagnosis of the world under the rule of technological determinism this book indicates the key points of transition between the pictorial representation that traditionally belonged to the history of art and the virtual presence that is approached in quite different ways today This book will be of interest to scholars working in art history image philosophy image studies and digital studies
