Artificial Intelligence in Architecture and the Built Environment

Michal Sourek, 2025-01-22

Imagine if every architect had an apprentice who could consistently observe and understand their intentions take over routine tasks and monitor technical environmental and economic constraints

This apprentice would continually improve freeing the architect to concentrate on truly creative work

This book outlines a plan to turn this vision into reality

It evaluates the development of artificial intelligence from its inception to the present focusing on the last two decades of applying AI in architectural design and planning

the current state of architectural practice is also examined

Integrating architecture computer science AI robotics economics law neurobiology and philosophy

the vision is built on three key premises

- i authentic poetic creativity that transcends parameterization and algorithmizing
- ii innovative learning strategies and training approaches not yet applied concerning architectural design and
- iii the convergence of architecture s inherent spatiality with virtual reality technology and new theories of human thinking and intelligence poised for implementation in machine learning
