Computational Social Networks Ajith Abraham, Aboul-Ella Hassanien, 2012-06-28 This book is the first of three volumes that illustrate the concept of social networks from a computational point of view. The other two volumes review issues of Security and Privacy and Mining and Visualization in CSNs. Topics and features: presents the latest advances in CSNs and illustrates how organizations can gain a competitive advantage by applying these ideas in real world scenarios; discusses the design and use of a wide range of computational tools and software for social network analysis; describes simulations of social networks; the representation and analysis of social networks and the use of semantic networks in knowledge discovery and visualization; provides experience reports, survey articles and intelligence techniques and theories relating to specific problems in network technology. **Daily Graphic** Ransford Tetteh, 2014-03-15 *Licensing Standard Essential Patents* Igor Nikolic, 2021-11-18 What is the licensing framework of standard essential patents (SEPs) for connectivity standards such as 5G and Wi-Fi? How will the framework change with the Internet of Things (IoT)? This book provides comprehensive answers to these questions. For over two decades, connectivity standards have been the subject of litigation and controversy around the globe. Now, with the introduction of 5G and the emergence of the world of connected objects or the IoT, the licensing framework for SEPs is becoming even more contentious. In order to bring clarity to the debate, this book analyses and explains key components of a fair, reasonable and non-discriminatory FRAND licence for SEPs; clarifies the economic policy and market background of SEP disputes; examines the interrelated application of contract, patent and competition laws; and describes the approaches by courts and regulators in the EU, US and the UK. Importantly, the book also assesses how the experience from the smartphone and ICT industries can be applied in a new environment of the IoT and considers what needs to be changed in the future SEP licensing landscape. The book provides a holistic coverage of SEP licensing issues in an attempt to reduce uncertainty within this highly complex and technical area and will be useful to practitioners, policy makers, SMEs and large technology companies in the IoT as well as academics interested in the field. **Bearing Witness While Black** Allissa V. Richardson, 2020-05-18 Modern black citizen journalists armed with little more than smartphones and a speedy WIFI connection are challenging longstanding narratives of race, power and privilege in the United States. This book investigates how anti-police brutality activists leverage the affordances of mobile and social media to report original news within the contemporary social justice beat. Through semi-structured interviews and a descriptive analysis of the activists' social media, Allissa V. Richardson investigates the journalistic roles that activists perform, the types of stories that they produce and the relationships that they have formed with their audiences.
