Student Loans in China Baoyan Cheng, 2011-03-24 In 1989 China started charging tuition on a very small scale at a number of universities as a result of the global trend of cost recovery policies thus ending the free higher education era in China It was not until 1997 that all higher education institutions in China started charging tuition and fees Both the expansion of higher education and the wide gap between income and tuition and fees have created an increasingly high proportion of students who are academically qualified but cannot afford to go to college To address the problem of the increasing number of financially needy students in 1999 China launched the pilot Government subsidized Student Loan Program GSSLP in eight cities This program was extended to full time students at all of the 1 942 public higher education institutions in 2000 and has been undergoing revisions ever since including major ones in 2004 and 2007 As of 2009 the number of financially needy students in China reached 5 27 million accounting for 23 06 percent of the total enrollment of 22 85 million at higher education institutions in China Behind those statistics are young people who suffer in many ways This book provides multiple perspectives namely global comparative empirical practical and philosophical ones on the GSSLP the largest financial aid program in current China It not only provides information on financial aid policies especially the GSSLP in China but also offers a comparative perspective by examining student loan programs in the United States and Australia which are more mature and better developed Using original dataset the empirical and practical perspectives examine the effect of the GSSLP on students behavior and look into the different aspects of the GSSLP including students perceptions of and attitudes toward the program as well as its implementation In addition to these technical aspects of the GSSLP this book also examines the larger concepts of equality and social justice from a philosophical perspective and argues *Higher Education Financing in India* Jinusha Panigrahi, 2022-06-07 This book critically examines the questions related to the access to and financing of higher education in India The rapid expansion of knowledge economy in the neo liberal era of globalisation has created an unprecedented demand for higher education especially skill based advanced learning However the inability of the government to meet the demand for public education the massification of the higher education and the rapid privatisation of the education sector have now created concerns over financing education and ensuring its equitable access The volume discusses the challenges faced by aspiring students to meet the rising cost of higher education as educational policies increasingly favour marketisation of higher education It sheds light on several alternative and innovative methods of financing with a focus on educational loans to highlight how inequities and inequalities affect access to educational loans in countries like India The book thus explores how this impacts students from the deprived disadvantaged sections of the society who are unable to access courses and institutions of their choice and therefore remain unsuitable to get absorbed in the evolving market economy An incisive read on the economics of education in India this book will be useful for scholars and researchers of education higher education public policy sociology development studies political science and

governance as well as for the policy makers The Economics and Financing of Higher Education in the United States
,1969 **Repaying your student loans** , *The Economics and Financing of Higher Education in the United States*
United States. Congress. Economic Joint Committee,1969 **Kiplinger's Personal Finance** ,2009-11 The most trustworthy
source of information available today on savings and investments taxes money management home ownership and many other
personal finance topics **Repay As You Earn** Philip G. Schrag,2001-11-30 In 1993 Congress created a student loan
repayment plan intended to enable high debt graduates to accept low income public service jobs by reducing their loan
payments and eventually forgiving part of their debts But this Congressional initiative only helps those with catastrophically
low incomes It has failed to attract many users because as implemented through regulations of the U S Department of
Education it requires payment over too long a period 25 years before forgiveness Many students go to graduate and
professional schools in pursuit of careers in public service But they often must borrow 100 000 or more to finance their
education Their loan repayment obligations become so high that they can no longer afford to follow their ideals and they
abandon their plans to have public service careers and seek employment with corporations or firms offering high salaries The
income contingent repayment plan should have appealed to would be public interest lawyers who are among the graduates
with the highest debt to income ratios but the plan has failed them and Schrag explores why and how the plan should be
reformed either by Congress or by the federal administration Get Real Money for College Naveen Krishnan,2008 The
poetry within this book is an epitaph of love and friendship The simplicity of these poems are reflections of people current
events and history Poetry of hope and written with insight I hope you enjoy the read Student Financing of Higher
Education Donald Heller,Claire Callender,2013-06-07 The financing of higher education is undergoing great change in many
countries around the world In recent years many countries are moving from a system where the costs of funding higher
education are shouldered primarily by taxpayers through government subsidies to one where students pay a larger share of
the costs There are a number of factors driving these trends including A push for massification of higher education in the
recognition that additional revenue streams are required above and beyond those funds available from governments in order
to achieve higher participation rates Macroeconomic factors which lead to constraints on overall government revenues
Political factors which manifest in demands for funding of over services thus restricting the funding available for higher
tertiary education A concern that the returns to higher education accrue primarily to the individual rather than to society and
thus students should bear more of the burden of paying for it This volume will help to contribute to an understanding of how
these trends occur in various countries and regions around the world and the impact they have on higher education
institutions students and society as a whole With contributions for the UK USA South Africa and China this vital new book
gives a truly global picture of the rapidly changing situation **Departments of Labor, Health and Human Services,
