WHY DO PEOPLE FLEE? David Feindouno, 2024-12-15 It s a reality that the world is divided An important thing we need to do is to influence people from a position of HATE to a position of ACCEPTANCE Is this realistic when many have unanswered questions and a strong disapproval of people s movement and displacement Unaware of the motive people cross borders from the first displacement across nation states to the first aliens acts in many countries followed by subsequent immigration acts and legislations to restrain human movement prevailing social cohesion Unaware of the root causes of displacement this provokes behaviours leading people to focus on human differences portraying migrants not only as a threat to society but also how troublesome they are As a society gaining knowledge is a step closer to ACCEPTANCE fostering cohesion With the lack of cohesion we give room to discrimination and racism Racism a result of historical power dynamics and colonialism has snuck its sinister way across the whole history of the human race The transatlantic slave trade the European empire and the colonial expansion all played a role into deepening racial stereotypes in communities around the world Even though those events in question occurred a while back their representation is still being endured nowadays It is without a doubt that the legacy of

colonialism has left its stain all over the world from the caste system in India to the persistent persecution experienced by Indigenous groups in Australia and Canada Why Do People Flee addresses the lack of awareness This book helps eradicate divisions based on people s wrong perceptions and therefore contributes to solving the world s problems emphasising on human s behaviour towards one s movements The author s lived experiences can aid in validating the idea that humans are traditionalist by nature protective of their values norms and attached to their cultures They are capable of discriminating against anyone who looks different or anyone who is perceived as a threat to their norms their interests and being To oppose and reject what is often perceived as aliens or invaders they might even go further by committing the worst discriminatory and racist acts to show their disdain for other people whom they know nothing about and whom they believe to be invaders and opportunists Yet the root causes based on our world history remain unknown This book speaks of history narrates world s realities that have impacted and driven our perceptions of the world we live in Climate Change in South Asia

Baniateilang Majaw,2020-05-28 This volume studies the challenges of climate change in South Asia and examines the role of the South Asian Association for Regional Cooperation SAARC in addressing them It highlights the dangers posed by climate change in South Asia and underlines the need to strengthen and intensify regional cooperation to preserve protect and manage the diverse and fragile eco systems of the region The book examines policies and initiatives of the SAARC in tackling these issues and also analyzes their implementation by member countries Comprehensive and topical this volume will be useful for scholars and researchers of South Asian Studies environmental studies climate change studies public policy and governance development studies international relations regional cooperation and political studies It will also be of importance to policymakers and NGOs working in this field *The New Walford* Ray Lester,2005 Covers 15 broad subject groupings social sciences generic psychology sociology social work politics government law finance accountancy industries business education sport media information and tools for information professionals **Marxism and the Origins of**

International Relations José Ricardo Villanueva Lira,2021-10-20 This book investigates to what extent and in what ways Marxist writings and precepts on imperialism informed the so called idealist stage of International Relations IR Though the formative years of International Relations coincide with a vibrant period in Marxist political thought Marxism is strikingly absent from the historiography of the discipline Building on the work of revisionist scholars the book reconstructs the writings of five benchmark IR thinkers Villanueva analyzes the cases of John Hobson Henry Brailsford Leonard Woolf Harold Laski and Norman Angell to explore the influence that Marxism played in their thinking and in the idealist years of the discipline more generally He ultimately demonstrates that although Marxist thought has been neglected by mainstream IR disciplinary historians it played a significant role in the discipline s early development As such this book both challenges the exclusion of Marxist thought from the mainstream disciplinary histories of IR and contributes to a deeper understanding of the role it played in early 20th century IR theory **Artificial Intelligence's Reproduction of Big Data-Based Race and**

Vajzović, 2021-07-30 This book analyzes a range of new developments in various fields concerning the concepts of chaos and complexity theory The proceedings of the 7th International Symposium on Chaos Complexity and Leadership feature newly developed concepts involving various research methodologies for identifying chaos and complexity in different fields of the sciences and leadership In addition it explores chaotic and complex systems from all fields of knowledge in order to stake a claim of prevalence of compatibility between knowledge fields Particular emphasis is placed on exploring non linearity in order to open a discussion on new approaches to and perspectives on chaos complexity and leadership Readers will find coverage of important events that have recently taken place in our world regardless of whether they were social political economic or scientific in nature The book explores diverse aspects of and issues related to the effects of chaos and complexity in the world discusses the application of nonlinear dynamics in order to arrive at transformational policies and offers projections of tomorrow s world using an interdisciplinary approach Though primarily intended for readers with an interest in nonlinear science thanks to its focus on the application of chaos and complexity to other disciplines the book appeals to a broad readership **International Journal of Social Sciences** , 2012-09 African Peacekeeping Training

Centres Anne Flaspöler, 2018-10-26 Peacekeeping training centres play a crucial role in preparing peacekeepers for their deployment However despite their popularity within the international community as a tool for achieving international security development and state building objectives they have not received a great deal of analysis or academic attention This book provides an in depth analysis of peacekeeping training in Africa tracing how centres have adapted to the operational and normative changes of peace operations over time and raising questions about the expectations attached to these training efforts and their impact The book examines training content and methods in detail exploring the potential of peacekeeping training centres as sites for socialisation and diffusing international norms in an effort to change and shape peacekeepers behaviour The analysis is based on two contrasting case studies selected to show the spectrum of training centres operating in Africa namely the Kofi Annan International Peacekeeping Training Centre KAIPTC in Accra Ghana and the African Centre for the Constructive Resolution of Disputes ACCORD in Durban South Africa At a time when impact is being determined by the number of course attendees this book provides an important critical assessment of training efforts and what they are supposed to achieve It will be of interest to scholars and practitioners within the fields of international security peacekeeping and African development *Culture's Consequences* Geert Hofstede, 2001 The publication of this second edition of *Culture's Consequences* marks an important moment in the field of cross cultural studies Hofstede s framework for understanding national differences has been one of the most influential and widely used frameworks in cross cultural business studies in the past ten years Australian Journal of Management International Taxation and Capitalism Andrés Blanco, 2025-02-04 The

book introduces a novel approach to international taxation through the lens of heterodox economic and social theories in particular Marxism The book argues that the radical reorganization of the international tax system that has been underway for the last few decades initiated by the OECD and furthered by the G20 and the European Union is a response to changes in the global structure of capitalism especially in terms of center periphery Through both normative analysis and empirical evidence the book shows that the global tax system emerging from these changes consolidates the regulatory and tax revenue control of the central states It also demonstrates that this consolidation and centralisation is designed to enable the dominance of multinational corporations in the global economy This path of international taxation is explained in the book through certain general concepts of Marxian economic theory such as the accumulation of capital and the tendency of the rate of profit to fall along with other specific developments such as the unequal participation of the different regions of the world in the capitalist system and a general theory of money that incorporates elements proposed by some sectors of post Keynesianism This book is invaluable reading for anyone interested in global capitalism the financial system heterodox economics and Marxist theory

International Labour Law Jean-Michel Servais, 2017-04-24 No one will deny that labour standards comprise a necessary framework for balanced economic and social development Yet on a global level such balanced development has not occurred despite the existence of a rigorous body of international labour law that has been active and growing for almost one hundred years The implementation of this law devolves upon states yet many states have failed to honour it If we are to take serious steps toward a remedy for this situation there is no better place to start than a thorough well researched survey and analysis of existing international labour law its sources its content its historical development and an informed consideration of the barriers to its full effectiveness This book is exactly such a resource It provides in depth interpretation of the crucial International Labour Organisation ILO instruments Constitution conventions declarations resolutions and recommendations as well as such other sources of law as the OECD Guidelines for Multinational Enterprises and various model and actual corporate codes of conduct Among the substantive areas of labour law covered in this book are the following the relationship between international labour law and economic competition standards on industrial relations collective bargaining and dispute settlement procedures protection of trade unions prohibitions on enforced and child labour promotion of equal opportunity and treatment time and rest provisions wage determination and protection occupational health and safety provisions special issues on non standard forms of employment foreign and migrant workers social security provisions privacy protection The presentation demonstrates that these rules and standards offer invaluable benchmarks to governments judiciaries employers and trade unions The book s combination of detailed commentary and an overarching social policy will make it especially valuable to legislators human resources managers employers organizations trade unions jurists and academics concerned with the role of work in our globalized social system This fifth edition of the book by Jean Michel Servais analyses the potential of those standards in a globalized world and the

necessary evolution It examines the actual implementation of those rules in the national context comparing different experiences It integrates the latest instruments It examines the most recent public debates on labour regulation dealing with health and security at work personal data minimum wages social security strikes etc updates the bibliography and opens some perspectives for the future work of the global institutions
