Foreword by Dr Foojan Zeine PsyD Winning the Talent War through Neurodivergence William J. Rothwell, Jonathan D. Zion, 2025-10-06 Recruiting talent from among the disabled population poses unique challenges which often are not adequately addressed by potential employers Although job seekers presently enjoy an advantage due to global talent shortages that situation may not continue Right now employers are hard pressed to find anyone to fill positions At this writing there are two job openings available for every one job applicant to fill it In that environment it makes sense for employers to explore alternative ways to get work done and alternative labor groups to do that work In Winning the Talent War through Neurodivergence A Guide for the Neurotypical William J Rothwell and Jonathan D Zion show how employers can overcome talent shortages by tapping into the often overlooked pool of talent comprising people with disabilities PWDs Few books examine the human resources processes relating to people with disabilities and this one provides a range of new insights This is a book for anyone involved in developing HR strategies or with responsibility for how human resources are utilized in general who are interested in improving the methods used to recruit and retain people with disabilities Human Performance Improvement William J. Rothwell, Carolyn K. Hohne, Stephen B. King, 2018-01-31 Organizations are under pressure to build and sustain competitive advantage with and through people For that reason managers continue to demand results from workers and look for as many ways as possible to increase productivity and decrease the costs of doing business Human performance improvement HPI is a systematic approach to securing better performance from people This book provides a thorough overview of the theory and practice of HPI looking at the long term action plan and specific interventions

that can improve productivity and address performance problems This new edition provides up to date references and sources examines the manager s role in HPI in more detail than previous editions and explores how to build on human performance improvement strengths and opportunities Written by a group of highly respected authors in the field this book will show you how to discover and analyze performance gaps plan for future improvements in human performance and design and develop cost effective interventions to close performance gaps HPI is not a tool reserved exclusively for training and development practitioners human resource specialists or external consultants Almost anyone can use it including managers supervisors and even employees making this book vital reading for anyone looking to improve human performance

High-Performance Coaching for Managers William J. Rothwell, Behnam Bakhshandeh, 2022-07-05 Coaching is a necessary skill for managers It is important as a fundamental part of an organization s talent efforts including talent acquisition development and retention strategies For a coaching program to succeed in an organization it should be recognized as a useful approach throughout the organization and become part of the fabric of the corporate culture Performance Coaching for Managers provides an important tool for organizations to use to train their managers on coaching This book differs significantly from other books in the coaching market Many books on coaching cast coaches as facilitators who question their clients the coachees helping them to articulate their own problems formulate their own solutions develop their own action plans to solve problems and measure the success of efforts to implement those plans That is called a nondirective approach But this book adopts a directive approach by casting the coach as a manager who diagnoses the problems with worker job performance and offers specific advice on how to solve those problems While there is nothing wrong with a nondirective approach it does not always work well in job performance reviews in which the manager must inform the worker about gaps between what is needed the desired and what is performed the actual The significant difference between what is currently available in the market and what is offered in this book is the authors collective experience of over 70 combined years of hands on research and delivery experiences in the Human Resources Development field According to the Harvard Business Review 2015 workers generally expect their immediate supervisors to give them honest feedback on how well they do their jobs and specific advice on what to do if they are not performing in alignment with organizational expectations When workers do not receive advice but instead are questioned about their own views they regard their managers as either incompetent or disingenuous Effective managers should be able to offer direction to their employees After all managers are responsible for ensuring that their organizational units deliver the results needed by the organization If they fail to do that the organization does not achieve its strategic goals This book gives managers direction in how to offer directive coaching to their workers

Performance Consulting Dana Gaines Robinson, James C. Robinson, 1995 The traditional training process confuses training activity with performance improvement by focusing on employees learning needs rather than on their performance needs Traditional programs focus on developing excellent learning experiences while failing to ensure that the newly acquired skills are transferred to the job Thus to be effective training professionals must become performance consultants shifting their focus from training delivery to the performance of the company and its individual contributors Dana Jim Robinson describe an approach suitable for use in any organizational setting or industry and with any content area Dozens of useful tools illustrative exercises and a case study that threads through the book show how the techniques described are applied in an organizational setting
