Unsettled Topics Concerning Sensors for Automated Road Vehicles Sven Beiker,2018-10-18 This SAE EDGE Research Report identifies key unsettled issues of interest to the automotive industry regarding the new generation of sensors

designed for vehicles capable of automated driving Four main issues are outlined that merit immediate interest First specifying a standardized terminology and taxonomy to be used for discussing the sensors required by automated vehicles Second generating standardized tests and procedures for verifying simulating and calibrating automated driving sensors Third creating a standardized set of tools and methods to ensure the security robustness and integrity of data collected by such sensors The fourth issue regarding the ownership and privacy of data collected by automated vehicle sensors is considered only briefly here since its scope far exceeds the technical issues that are the primary focus of the present report SAE EDGE Research Reports are preliminary investigations of new technologies The three technical issues identified in this report need to be discussed in greater depth with the aims of first clarifying the scope of the industry wide alignment needed second prioritizing the issues requiring resolution and third creating a plan to generate the necessary frameworks practices and protocols Click here to access the full SAE EDGETM Research Report portfolio <https://doi.org/10.4271/EPR2018001>
