Peritoneal Carcinomatosis A Multidisciplinary Approach Cancer Treatment And Research:

Peritoneal Carcinomatosis: A Multidisciplinary Approach Wim Ceelen, 2007-03-06 This is the first volume to provide a multidisciplinary approach to peritoneal carcinomatosis encompassing molecular mechanisms histopathology regional and systemic cytotoxic therapy and surgical options Illustrations aid the reader throughout in the many facets of this disease The book will be of particular interest for medical surgical and gynecological oncologists faced with the complexities of decision making in patients suffering from PC **Intraperitoneal Cancer Therapy** Wim P. Ceelen, Edward Levine, 2015-10-22

Intraperitoneal Cancer Therapy Principles and Practice is one of the first books to combine the latest clinical developments in the treatment of patients with peritoneal surface disease and the scientific principles that underlie the concept of intraperitoneal cancer therapy The book covers basic concepts such as anatomy physiology pharmacology *Biological and Hormonal Therapies of Cancer* Kenneth A. Foon, Hyman B. Muss, 2012-12-06 This volume *Biological and Hormonal Therapies of Cancer* which is part of the series *Cancer Treatment and Research* presents selected new information concerning biologic and hormonal therapy of cancer We have attempted to provide the reader with topics of major interest in a timely fashion There is renewed interest in biologic therapy of cancer Two chapters review the role of interferon in the hematologic malignancies and in solid tumors Vaccine therapies have come to the forefront of cancer therapy recently and two chapters approach different strategies of vaccine therapies one reviews the cellular vaccine therapies and another the anti idotype approach The hormonal therapy chapters focus on current uses of endocrine therapy in endometrial breast and prostate cancer In addition hormonal strategies for the prevention of breast cancer and endometrial cancer including exciting information relating to phytochemicals are presented The effects of tamoxifen on endometrium is a topic of major interest and is discussed in detail Finally there is a chapter on estrogen receptor expression and regulation in human breast cancer These chapters are all written by experts in the field and contain timely and relevant information of interest to laboratory and clinical scientists and practitioners alike Biologic and endocrine therapies represent major areas of cancer research interest The advent of newer biologic therapies including new antibody targeted treatments and the use of biologics as tumor modulators to enhance the effects of other treatment regimens is an exploding avenue of research Advances in Radiation Therapy Bharat B. Mittal, James A. Purdy, K.K. Ang, 2012-12-06 Recent advances in radiation oncology have depended upon and are intertwined with subsequent scientific discoveries and the development of new techniques in the fields of radiation and molecular biology physics electrical engineering surgery and medical oncology This volume describes how some of the recent discoveries in the radiological sciences have influenced the way radiation oncology is practised As there are many advances in this field the Editors have chosen to concentrate on selected topics in clinical radiotherapy radiation physics and biology and technical innovations that have had a major impact on radiation oncology in the past twenty years It is hoped that the techniques described in this volume will increase tumor control and prolong patient survival and at the same time

decrease radiation induced side effects and complications

Ethical Issues in Cancer Patient Care Peter

Angelos, 2013-04-17 This book addresses a variety of ethical issues that arise in the care of oncology patients. Many volumes have been written on medical ethics in the past 30 years. However, few have focused on ethical issues specific to the care of cancer patients. This book brings together such a focused examination. The contributors are experienced clinicians, ethicists, medical humanists, and medical educators. The issues raised have direct relevance to the care of oncology patients in treatment as well as research settings. The chapters address issues that are central to contemporary medical practice and medical ethics inquiry. Any practicing clinician will be well aware of the problems of communication and how uncertainty, cross-cultural issues, and religious influences can impact patient care. The limits of care and the role of advance directives and palliative care are common issues that must be addressed in treating patients at the end of life. For oncologists and oncology patients, participation in clinical trials may be a thorny topic, especially when phase I clinical trials are being considered. The impact of managed care and reimbursement issues cannot be avoided in the contemporary patient care and similarly cannot be neglected when considering the ethical ramifications raised. No discussion of ethics in oncology can be complete without attention to the specific challenges raised by the pediatric patient with cancer. All of these topics are explored by the contributors to this book.

Surgical Oncology Raphael E. Pollock, 2012-12-06 Among the standard oncology modalities, surgical oncology is singular in that it lacks a separate board certification or even an added qualification mechanism. Card-carrying surgical oncologists are certified by the American Board of Surgery as are all other general surgeons. What distinguishes the surgical oncologist is a set of cognitive skills rather than a specific armamentarium of surgical techniques. This different conceptual framework is derived from extensive additional training that leads to an in-depth understanding of the natural history and biologic behavior of the various solid tumor systems. Equipped with this perspective, the surgical oncologist is particularly well positioned to integrate the various available therapeutic modalities into a coherent care program for the solid tumor patient. As a central theme, the chapters of this book demonstrate that increasingly sophisticated diagnostic and staging approaches are helping to move chemotherapy and radiotherapy into the preoperative neoadjuvant setting. This fundamental alteration is based on the awareness that even early-stage solid tumor disease is frequently systemic at the time of presentation, at least on a subclinical level. And although the primary tumor may be controllable by surgery, with radiotherapy the uncontrolled and initially clinically unapparent distant disease ultimately determines patient survival. The other perspective driving the neoadjuvant approach is an emerging awareness that for most solid tumor systems, neoadjuvant treatment responses can facilitate less mutilating surgery with comparable levels of local disease control.

Drug Resistance William N. Hait, 2012-12-06 Resistance to treatment represents the final common outcome for far too many patients with cancer. Even our most promising new drugs fall victim to drug resistance. Hormones and newer biological therapies, though safe and active, also lose their activity over time. In this volume of Drug Resistance, leading

investigators in the field have reviewed the most basic mechanisms of drug resistance and have proposed ways to modulate resistance This comprehensive volume should be of value for basic and clinical scientists who wish to delve more deeply into this intriguing problem in the laboratory and devastating problem in the clinic **Principles and Practice of Gynecologic Oncology** Richard R. Barakat, Maurie Markman, Marcus Randall, 2009 Providing comprehensive coverage of the biology of gynecologic cancer the therapeutic modalities available and the diagnosis and treatment of site specific malignancies this edition has 30 percent new contributing authors and new material A companion Web site offers a fully searchable text

Oncology, 2004 **Anticancer Research**, 1981 *Hepato-gastroenterology*, 2009 *Medical and Health Care Books and Serials in Print*, 1997 *Subject Guide to Books in Print*, 1997 *The MD Anderson Manual of Medical Oncology* Hagop M. Kantarjian, Robert A. Wolff, Charles A. Koller, 2006-04-10 The MD Anderson Manual of Medical Oncology was designed to fill an important void in oncology reference material by serving as a hands on resource for the practicing oncologist It was written exclusively by MD Anderson faculty and fellows with the idea of presenting a bird s eye view of medical oncology as it is currently practiced at that institution While definitely written from the perspective of the medical oncologist this book clearly emphasizes MD Anderson s multidisciplinary approach to cancer care Furthermore while evidence based rationales are given for patient care strategies no apologies are offered for articulating the unique perspectives and biases as they apply to cancer biology and therapy as practiced at this top rated cancer center The rationales for ongoing clinical trials are clearly articulated as well as the importance of ongoing clinical investigation The authors have filled the book with tables graphics relevant pathology figures and other illustrative images making it visually stimulating Flowchart and diagrammatic algorithms are supplied to provide readers with a practical guide to the diagnostic and therapeutic strategies used at MD Anderson Numerous chapters address important palliative and supportive measures such as oncologic emergencies infections endocrine manifestations of non endocrine tumors palliation and long term followup **Current Research on Clinical Cancer Diagnosis, Therapy and Patient Care** International Cancer Research Data Bank. Current Cancer Research Project Analysis Center, Smithsonian Science Information Exchange. Current Cancer Research Project Analysis Center, 1975 **Research grants (National Institutes of Health (U.S.)). 1983 |publ 1984**, 1975* In Vivo, 2009 **Management of Metastatic Disease to the Musculoskeletal System** John P Heiner, Timothy J Kinsella, Thomas Zdeblick, 2002 Metastatic Disease to the Musculoskeletal System is a comprehensive text designed for use by clinicians from multiple disciplines As approximately 70% of people who die of cancer have metastatic musculoskeletal system it has become a common problem seen by oncologists orthopedic surgeons radiation therapists and internists However to date no text has been available that has provided a solid multidisciplinary approach to these conditions This book has contributors from many disciplines who offer their insight and experience in treating these devastating and complicated problems **The Care of Individuals with Cancer** Susan L.
