Time Series for Data Science Wayne A. Woodward, Bivin Philip Sadler, Stephen Robertson, 2022-08-01 Data Science
students and practitioners want to find a forecast that works and don't want to be constrained to a single forecasting strategy
Time Series for Data Science Analysis and Forecasting discusses techniques of ensemble modelling for combining
information from several strategies Covering time series regression models exponential smoothing Holt Winters forecasting
and Neural Networks It places a particular emphasis on classical ARMA and ARIMA models that is often lacking from other
textbooks on the subject This book is an accessible guide that doesn't require a background in calculus to be engaging but
does not shy away from deeper explanations of the techniques discussed Features Provides a thorough coverage and
comparison of a wide array of time series models and methods Exponential Smoothing Holt Winters ARMA and ARIMA deep
learning models including RNNs LSTMs GRUs and ensemble models composed of combinations of these models Introduces
the factor table representation of ARMA and ARIMA models This representation is not available in any other book at this
level and is extremely useful in both practice and pedagogy Uses real world examples that can be readily found via web links
from sources such as the US Bureau of Statistics Department of Transportation and the World Bank There is an
accompanying R package that is easy to use and requires little or no previous R experience The package implements the wide
variety of models and methods presented in the book and has tremendous pedagogical use **UPPCS (J) Prelims PYP**
