outside the boat and trying to guess whether the conditions might be light medium or strong Wind strategy has been substantially overhauled The usual classification system for wind shift patterns has been extended into four new groupings These ideas combined with explanations of wind sense enable sailors to make direct connections between what they see and the best strategies for winning races Other novel topics include three phase oscillating breezes the no brainer race the eight standard port starboard crossing strategies how to not use a compass explanation of offshore breeze patterns the complexities and misinformation about sailing in current a complete sail racing performance model psychological performance issues how risk management and wind strategy combine and how to build your own wind forecasting system Finally these ideas are presented as conversations between the Doc and his fictional friends rather than as lists of instructions Throughout the text there are margin notes and at the end of each chapter there is a simple summary of the main ideas
