College Rankings How To Returns:

World University Rankings and the Future of Higher Education Downing, Kevin, Ganotice, Jr., Fraide A., 2016-10-06
Delivering quality education to students while remaining competitive at an international level is only one of the many challenges universities face today To attain their goals universities must adopt new strategies to achieve academic excellence World University Rankings and the Future of Higher Education is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions providing a thorough overview of the impacts of these rankings on educational quality Exploring the benefits and challenges of this system in a global context this book is ideally designed for academicians researchers students administrators and policy makers interested in the effects of university rankings in the education sector and beyond

University Rankings Jung Cheol Shin, Robert K. Toutkoushian, Ulrich Teichler, 2011-06-06 This ground breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases methodological issues societal impact and policy implications providing readers with a deep understanding of these controversial comparators The authors propose that university rankings are misused by policymakers and institutional leaders alike They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys assessment of their status The result is that institutions suffer from short termism realigning their resources to maximize their relative rankings While rankings are widely used in policy and academic discussions this is the first book to explore the theoretical and methodological issues of ranking itself It is a welcome contribution to an often highly charged debate Far from showing how to manipulate the system this collection of work by key researchers aims to enlighten interested parties

Return to Meaning Mats Alvesson, Yiannis Gabriel, Roland Paulsen, 2017 This book argues that we are currently witnessing not merely a decline in the quality of social science research but the proliferation of meaningless research of no value to society and modest value to its authors apart from securing employment and promotion The explosion of published outputs at least in social science creates a noisy cluttered environment which makes meaningful research difficult as different voices compete to capture the limelight even briefly Older more significant contributions are easily neglected as the premium is to write and publish not read and learn The result is a widespread cynicism among academics on the value of academic research sometimes including their own Publishing comes to be seen as a game of hits and misses devoid of intrinsic meaning and value and of no wider social uses whatsoever Academics do research in order to get published not to say something socially meaningful This is what we view as the rise of nonsense in academic research which represents a serious social problem It undermines the very point of social science This problem is far from academic It affects many areas of social and political life entailing extensive waste of resources and inflated student fees as well as costs to tax payers Part two of the book offers a range of proposals aimed at restoring meaning at the heart of social research and drawing social science back address the major problems and issues

that face our societies *Academic Capitalism* Richard Münch, 2014-04-16 This book investigates the intensifying struggle for excellence between universities in a globalized academic field The rise of the entrepreneurial university and academic capitalism are superimposing themselves on the competition of scientists for progress of knowledge and recognition by the scientific community The result is a sharpening institutional stratification of the field This stratification is produced and continuously reproduced by the intensified struggle for funds with the shrinking of block grants and the growing significance of competitive funding as well as the increasing impact of international and national rankings on academic research and teaching The increased allocation of funds on the basis of performance leads to overinvestment of resources at the small top and underinvestment for the broad mass of universities in the middle and lower ranks There is a curvilinear inverted u shaped relationship of investments and returns in terms of knowledge production Paradoxically the intrusion of the economic logic and measures of managerial controlling into the academic field imply increasing inefficiency in the allocation of resources to universities The top institutions suffer from overinvestment the rank and file institutions from underinvestment The economic inefficiency is accompanied by a shrinking potential for renewal and open knowledge evolution Special bulletin of the Bureau of Business Research, College of Commerce and Administration, the Ohio State University , 1928

Ranking Systems on Universities Kevin Downing, Petrus Johannes Loock, Sarah Gravett, 2021-04-05 This book written by three generations of rankings academics with considerable experience from three very different regions of the globe lifts the lid on the real impact of higher education ranking systems HERS on universities and their stakeholders It critically analyses the criteria that make up the Big Three global ranking systems and using interviews with senior administrators academics and managers discusses their impact on universities from four very different continents Higher education continues to be dominated by a reputational hierarchy of institutions that sustains and is reinforced by HERS Despite all the opinions and arguments about the legitimacy of the rankings as a construct it seems experts agree that they are here to stay The question therefore seems to be less about whether or not universities should be compared and ranked but the manner in which this is

undertaken Delivering a fresh perspective on global rankings this book summarizes the development of HERS and provides a critical evaluation of the effects of HERS on four different major regions South Africa the Arab region South East Asia and Australia It will appeal to any academic student university administrator or governing body interested in or affected by global higher education ranking systems *Learning SQL* Alan Beaulieu,2020-03-04 As data floods into your company you need to put it to work right away and SQL is the best tool for the job With the latest edition of this introductory guide author Alan Beaulieu helps developers get up to speed with SQL fundamentals for writing database applications performing administrative tasks and generating reports You ll find new chapters on SQL and big data analytic functions and working with very large databases Each chapter presents a self contained lesson on a key SQL concept or technique using numerous illustrations and annotated examples Exercises let you practice the skills you learn Knowledge of SQL is a must for interacting with data With *Learning SQL* you ll quickly discover how to put the power and flexibility of this language to work Move quickly through SQL basics and several advanced features Use SQL data statements to generate manipulate and retrieve data Create database objects such as tables indexes and constraints with SQL schema statements Learn how datasets interact with queries understand the importance of subqueries Convert and manipulate data with SQL s built in functions and use conditional logic in data statements *Return Migration Decisions* Ruth Achenbach,2016-10-21 Ruth Achenbach develops a model of individual return migration decision making which examines both the process and the decisive factors in return migration decision making of Chinese highly skilled workers and students in Japan She proposes to answer a question yet insufficiently explained by migration research why do migrants deviate from their migration intentions and return sooner or later than planned or not at all Her study integrates factors from the spheres of career family and lifestyle and redefines stages in long term decision making processes thereby contributing to decision and migration theory She analyzes migrants shifting priorities over the course of migration including a perspective on life course and on the impact of the triple catastrophe of March 11 2011 *So You Want to Be a Lawyer?* David Weisbrot,2013-01-01 *So You Want to Be a Lawyer* is the first comprehensive Australian guide written for people who are contemplating enrolling in a law degree whether as an undergraduate or as a postgraduate as well as for those who are already enrolled but wondering where their law degree may lead them This essential guide provides The basic structures of the Australian legal professions and the best reasons for studying or not studying Law at university The history and development of legal education in Australia including the modern trend towards clinical education and professional skills development A description of each of the 36 Australian university law schools highlighting what each institution offers and what it believes makes it unique A checklist of the features factors and costs to be considered in making an informed decision about which law school to choose including information addressed to Indigenous students women LGBTI students students with a disability and those from rural remote and regional Australia Insights into the life of a law student including survival strategies study tips and getting the most out

of student life An original analysis of the highly dynamic Australian legal professions which are rapidly adapting to a new environment prompted by competition information and communications technology and globalisation So You Want to Be a Lawyer provides all of the information any prospective law student will need to make an informed and intelligent decision about the best place for them to study what to study and where it all might lead *Higher Education Accountability* Robert Kelchen,2018-02-27 The first comprehensive overview charting the accountability of higher education As the price tag of higher education continues to rise colleges and universities across the country are under increasing pressure to demonstrate their value Graded on numerous metrics including cost and ability to prepare students for the job market colleges must satisfy requirements from multiple stakeholders State and federal governments demand greater accountability Foundations and private donors as well as today s parents and students approach education with a consumer sensibility How can colleges navigate these pressures while trying to stay true to their missions and values In *Higher Education Accountability* Robert Kelchen delivers the first comprehensive overview of how colleges in the United States came to face such overwhelming scrutiny Beginning with the earliest efforts to regulate schools Kelchen reveals the rationale behind accountability and outlines the historical development of how federal and state policies accreditation practices private sector interests and internal requirements have become so important to institutional success and survival With so many diverse and conflicting entities holding colleges responsible for their performance the variety of accountability systems in play can have both intended and unintended consequences Immersed as they are in current debates about how best to respond to these pressures faculty and administrators will welcome this up to date and timely account which offers not only a look at current practices but also an examination of the future of accountability in American higher education **Rankings and Accountability in Higher Education: Uses and Misuses** Priscilla Toka Mmantsetsa Marope,Peter J. Wells,Unesco,Ellen Hazelkorn,2013-01-01 The growing impact of university rankings on public policy and on students choices has stirred controversy worldwide This unique volume brings together the architects of university rankings and their critics to debate the uses and misuses of existing rankings With voices from five continents it provides a comprehensive overview of current thinking on the subject and sets out alternative approaches and complementary tools for a new era of transparent and informed use of higher education ranking tables *The Return of Inequality* Mike Savage,2021-05-18 A pioneering book that takes us beyond economic debate to show how inequality is returning us to a past dominated by empires dynastic elites and ethnic divisions The economic facts of inequality are clear The rich have been pulling away from the rest of us for years and the super rich have been pulling away from the rich More and more assets are concentrated in fewer and fewer hands Mainstream economists say we need not worry what matters is growth not distribution In *The Return of Inequality* acclaimed sociologist Mike Savage pushes back explaining inequality s profound deleterious effects on the shape of societies Savage shows how economic inequality aggravates cultural social and political conflicts challenging the coherence of liberal

democratic nation states Put simply severe inequality returns us to the past By fracturing social bonds and harnessing the democratic process to the strategies of a resurgent aristocracy of the wealthy inequality revives political conditions we thought we had moved beyond empires and dynastic elites explosive ethnic division and metropolitan dominance that consigns all but a few cities to irrelevance Inequality in short threatens to return us to the very history we have been trying to escape since the Age of Revolution Westerners have been slow to appreciate that inequality undermines the very foundations of liberal democracy faith in progress and trust in the political community s concern for all its members Savage guides us through the ideas of leading theorists of inequality including Marx Bourdieu and Piketty revealing how inequality reimposes the burdens of the past At once analytically rigorous and passionately argued **The Return of Inequality** is a vital addition to one of our most important public debates

Refugee and Return Supang Chantavanich,Aungkana Kamonpetch,2016-12-09 This book provides essential background information on the protracted displacement of several ethnic groups along the Thai Myanmar border before turning to an examination of whether Myanmar has now shifted into a post conflict society the expected challenges involved in reintegrating returnees to Myanmar and the possibility of voluntary and sustainable repatriation The authors conclude that given the current ongoing security challenges and the lack of job opportunities in Myanmar voluntary repatriation is not yet feasible as a long term solution After more than 60 years of conflict and displacement Myanmar is now in the midst of political reform A new nominally civilian government and the promise of elections in 2015 have raised hopes of a lasting democratic transition after years of military rule For the first time in decades repatriation of refugees in Thailand is being discussed as a real and imminent possibility
