Perception and its Objects Bill Brewer, 2013-03-07 Bill Brewer presents motivates and defends a bold new solution to a fundamental problem in the philosophy of perception What is the correct theoretical conception of perceptual experience and how should we best understand the most fundamental nature of our perceptual relation with the physical objects in the world around us Most theorists today analyse perception in terms of its representational content in large part in order to avoid fatal problems attending the early modern conception of perception as a relation with particular mind dependent objects of experience Having set up the underlying problem and explored the lessons to be learnt from the various difficulties faced by opposing early modern responses to it Bill Brewer argues that this contemporary approach has serious problems of its own Furthermore the early modern insight that perception is most fundamentally to be construed as a relation of conscious acquaintance with certain direct objects of experience is he claims perfectly consistent with the commonsense identification of such direct objects with persisting mind independent physical objects themselves Brewer here provides a critical historical account of the philosophy of perception in order to present a defensible vindication of empirical realism **Perception and Its Objects** ,2011 *Object Perception* Bryan E.
