Nemeth,Erik Hollnagel,2021-10-11 Resilience Engineering RE studies have successfully identified and described many instances of resilient performance in high hazard sectors as well as in the far more frequent cases where people and organisations cope with the uncertainties of daily operations Since RE was first described in 2006 a steady accumulation of insights and efforts have provided the basis for practical tools and methods This development has been documented by a series of texts in the Resilience Engineering Perspectives series as well as by a growing number of papers and reports This book encapsulates the essential practical lessons learned from the use of Resilience Engineering RE for over ten years The main contents are a series of chapters written by those who have been instrumental in these applications To increase the value for the reader each chapter will include rationale for the overall approach data sought and reason s for choosing data sources used data analyses performed and how recommendations were made and turned into practice Serving as a reference for practitioners who want to analyse support and manage resilient performance this book also advances research into RE by inquiring why work goes well in unpredictable environments to improve work performance or compensate for deficiencies

[Human Performance on the Flight Deck](#) Don Harris,2016-12-05 Taking an integrated systems approach to dealing exclusively with the human performance issues encountered on the flight deck of the modern airliner this book describes the inter relationships between the various application areas of human factors recognising that the human contribution to the operation of an airliner does not fall into neat pigeonholes The relationship between areas such as pilot selection training flight deck design and safety management is continually emphasised within the book It also affirms the upside of human factors in aviation the positive contribution that it can make to the industry and avoids placing undue emphasis on when the human component fails The book is divided into four main parts Part one describes the underpinning science base with chapters on human information processing workload situation awareness decision making error and individual differences Part two of the book looks at the human in the system containing chapters on pilot selection simulation and training stress fatigue and alcohol and environmental stressors Part three takes a closer look at the machine the aircraft beginning with an examination of flight deck display design followed by chapters on aircraft control flight deck automation and HCI on the

flight deck Part four completes the volume with a consideration of safety management issues both on the flight deck and across the airline the final chapter in this section looks at human factors for incident and accident investigation The book is written for professionals within the aviation industry both on the flight deck and elsewhere for post graduate students and for researchers working in the area *Flight International* ,1999
