Weinert, Marion Perlmutter, 2013-05-13 This volume a collection of papers resulting from a conference sponsored by the Max Planck Society presents an overview of past research on memory development possible applications of this research and new ideas for future areas of study The role of cognitive components in the development of memory performance and the social and motivational contexts of memory development are described Includes various theoretical approaches explaining memory development across the life span Memory Development Universal Changes and Individual Differences is of interest to researchers undergraduates and graduate students in developmental psychology educational psychology and technology and experimental psychology Student Achievement in Türkiye Findings from PISA and TIMSS International Assessments OECD, 2022-11-25 Türkiye's trajectory of improvement over the past two decades stands out internationally Few other countries have been able to bring previously out of school children into the education system and improve performance at the same time **Rust High Performance** Iban Eguia Moraza, 2018-03-28 Find bottlenecks identify the proper algorithm to use optimize performance and create really efficient Rust applications Key Features Understand common performance pitfalls and improve the performance of your applications Get to grips with parallel programming and multithreading with Rust Learn metaprogramming in Rust Book Description At times it is difficult to get the best performance out of Rust This book teaches you to optimize the speed of your Rust code to the level of languages such as C C++ You'll understand and fix common pitfalls learn how to improve your productivity by using metaprogramming and speed up your code by concurrently executing parts of it safely and easily You will master the features of the language which will make you stand out and use them to really improve the efficiency of your algorithms The book begins with a gentle introduction to help you identify bottlenecks when programming in Rust We highlight common performance pitfalls along with strategies to detect and resolve these issues early We move on to mastering Rust's type system which will enable us to create impressive optimizations in both performance and safety at compile time You will then learn how to effectively manage memory in Rust mastering the borrow checker We move on to measuring performance and you will see how this affects the way you write code Moving ahead you will perform metaprogramming in Rust to boost the performance of your code and your productivity You will finally learn parallel programming in Rust which enables efficient and faster execution by using multithreading and asynchronous programming What you will learn Master tips and tricks to make your code faster Learn how to identify bottlenecks in your Rust applications Discover how to profile your Rust software Understand the type system to create compile time optimizations Master the borrow checker Learn metaprogramming in Rust to avoid boilerplate code Discover multithreading and work stealing in Rust Understand asynchronous programming in Rust Who this book is for This book is for Rust developers keen to improve the speed of their code or simply to take their skills to the next level *Social Work with Children and Their*

Families Christopher G. Petr, 2004 An extensively revised version of the first edition this text focuses on the practical foundational knowledge required to practice social work effectively in the complex and fast changing world of services to children and their families The core organizing framework consists of eight pragmatic perspectives combating adultcentrism family centered practice the strengths perspective respect for diversity and difference the least restrictive alternative ecological perspective organization and financing and achieving outcomes Unlike most texts that focus either on direct practice or on policy Petr s revised volume integrates current policy including recent reform efforts with best practices The student thus gains a deep appreciation for how direct social work practice is linked to and even guided by contemporary policy initiatives and the values that underscore those initiatives Two new chapters are devoted specifically to the fields of child welfare and children s mental health providing an overview of the laws policies practices and terminology pertaining to each setting The next eight chapters focus on each pragmatic perspective and its relevance to child welfare and children s mental health The in depth case studies that comprise the concluding two chapters illustrate how typical client situations can be successfully addressed within the context of the pragmatic perspectives Packed with case studies specific practice instruction chapter summaries and suggested learning activities this book prepares students and practitioners to think and act professionally in ways that are consistent with current laws values policies and reform efforts in the field

Human Performance in Automated and Autonomous Systems Mustapha Mouloua, Peter A. Hancock, 2019-09-19 This book examines recent advances in theories models and methods relevant to automated and autonomous systems The following chapters provide perspectives on modern autonomous systems such as self driving cars and unmanned aerial systems directly from the professionals working with and studying them Current theories surrounding topics such as vigilance trust and fatigue are examined throughout as predictors of human performance in the operation of automated systems The challenges related to attention and effort in autonomous vehicles described within give credence to still developing methods of training and selecting operators of such unmanned systems The book further recognizes the need for human centered approaches to design a carefully crafted automated technology that places the human user in the center of that design process Features Combines scientific theories with real world applications where automated technologies are implemented Disseminates new understanding as to how automation is now transitioning to autonomy Highlights the role of individual and team characteristics in the piloting of unmanned systems and how models of human performance are applied in system design Discusses methods for selecting and training individuals to succeed in an age of increasingly complex human machine systems Provides explicit benchmark comparisons of progress across the last few decades and identifies future prognostications and the constraints that impinge upon these lines of progress Human Performance in Automated and Autonomous Systems Current Theory and Methods illustrates the modern scientific theories and methods to be applied in real world automated technologies

Nguyen,2002-06-08 The Fuller School is one of the six elementary schools in Gloucester Massachusetts a small urban community known for shipbuilding and fishing Fuller students come from a wide range of socioeconomic backgrounds from public housing facilities to affluent families and a variety of ethnic groups including Italian Hispanic and Vietnamese With its diverse population the Fuller School represented an excellent environment to test the use of Multiple Intelligences MI as a foundation for its curriculum This study aimed to examine one of the ten objectives of the FIRST Schools and Teacher Program Grant To improve student achievement on standardized tests by using multiple intelligences instruction The results of the California Achievement Test 5 CAT 5 given at grade 5 tended to show no differences between students in the MI and the traditional school program Although no association between CAT 5 outcomes and the MI treatment were found two report card outcomes at the sixth grade level Math and Physical Education and an

interaction of Program type with Home language on Music were found to be significant. By and large the magnitude of these differences was not large enough to conclude that the MI treatment was effective in producing larger standardized test scores than students in the non MI program. Yet considering that the MI program emphasizes different kinds of activities and more diverse ways of learning and provides an alternative to the traditional classroom this result of no differences between programs can be thought of a success for the MI community. Participants in the MI program performed just as well as those who had been in the traditional program. This case study is unusual because public schools rarely assigned their students randomly to experimental programs through a lottery process. Although students were randomly assigned to MI and traditional classrooms accounting for several additional demographic variables in the students personal and family background helped to characterize the differences in student performance in language mathematics social studies science arts physical education and music. Educators should find the results encouraging even with no differences in test scores and grades because this indicates that MI approaches are competitive with traditional ones. These findings shed new light on the application of MI and given the growth in its use provides a much needed comparison for those interested in implementing it as one component of educational reform.

Managing Employee Performance and Reward John Shields, Jim Rooney, Michelle Brown, Sarah Kaine, 2020-01-02 Focuses on performance and reward using systems thinking and a dual model of strategic alignment and psychological engagement

Human Fallibility Johannes Bauer, Christian Harteis, 2012-03-17 A curious ambiguity surrounds errors in professional working contexts they must be avoided in case they lead to adverse and potentially disastrous results yet they also hold the key to improving our knowledge and procedures. In a further irony it seems that a prerequisite for circumventing errors is our remaining open to their potential occurrence and learning from them when they do happen. This volume the first to integrate interdisciplinary perspectives on learning from errors at work presents theoretical concepts and empirical evidence in an attempt to establish under what conditions professionals deal with errors at work productively in other words learn the lessons they contain. By drawing upon and combining cognitive and action oriented approaches to human error with theories of adult professional and workplace learning this book provides valuable insights which can be applied by workers and professionals. It includes systematic theoretical frameworks for explaining learning from errors in daily working life methodologies and research instruments that facilitate the measurement of that learning and empirical studies that investigate relevant determinants of learning from errors in different professions. Written by an international group of distinguished researchers from various disciplines the chapters paint a comprehensive picture of the current state of the art in research on human fallibility and learning from errors at work.
