Cash App Cyber Monday 2025

Tarnveer Singh, Sarah Y. Zheng

Cash App Cyber Monday 2025:

The Psychology of Cybersecurity Tarnveer Singh, Sarah Y. Zheng, 2025-08-29 This book takes a fresh look at the underappreciated role of human psychology in cybersecurity and information technology management. It discusses the latest insights from practice and scholarly work on the role of cognitive bias and human factors in critical decisions that could affect the lives of many people. Written by an experienced chief information security officer (CISO) and an academic with over two decades of lived experience dealing with cybersecurity risks, this book considers the psychological drivers and pitfalls of the four key personas in cybersecurity: from hackers and defenders to targeted individuals and organisational leaders. It bridges state-of-the-art research findings with real-world examples and case studies to show how understanding the psychological factors in cybersecurity can help people protect themselves and their organisations better. Full of advice on security best practices that consider the human element of cybersecurity, this book will be of great interest to professionals and managers in the cybersecurity domain, information technology, and governance and risk management. It will also be relevant to students and those aspiring to grow in this field.

AI for Climate Change and Environmental Sustainability Suneeta Satpathy, Satyasundara Mahapatra, Nidhi Agarwal, Sachi Nandan Mohanty, 2024-08-14 This book discusses the adverse effects of climatic changes on our planet. It examines AI-based tools and technologies and how they can assist in identifying energy emission reductions, CO₂ removal, and support the development of greener transportation networks, monitoring deforestation, and forecasting extreme weather events. *AI for Climate Change and Environmental Sustainability* identifies and discusses in detail the importance of environmental sustainability based on accomplishment of the UN's 17 Sustainable Developmental Goals (SDGs). It presents the various AI-based possibilities for accelerating international efforts to safeguard the environment and conserve natural resources. The authors offer a comprehensive analysis of the emerging field of climate change in relation to Internet of Things, artificial intelligence, machine learning, and deep learning. The book discusses AI developments, applications, and best practices that will help us transition to a low-carbon future on both a regional and global scale. It provides case studies with analytical results pertinent to climate change and weather prediction and includes chapters with a research-oriented approach which can encourage new developments in the field of sustainable climate and green environment. The book can be used as a primary textbook for graduate and postgraduate students in technology and science as well as a reference for researchers, academics, and IT professionals working on climate change and sustainability initiatives.
