Planning for Equitable Urban Agriculture in the United States Samina Raja, Marcia Caton Campbell, Alexandra Judelsohn, Branden Born, Alfonso Morales, 2024-03-19 This open access book building on the legacy of food systems scholar and advocate Jerome Kaufman examines the potential and pitfalls of planning for urban agriculture UA in the United States especially in how questions of ethics and equity are addressed The book is organized into six sections Written by a team of scholars and practitioners the book covers a comprehensive array of topics ranging from theory to practice of planning for equitable urban agriculture Section 1 makes the case for re imagining agriculture as central to urban landscapes and unpacks why how and when planning should support UA and more broadly food systems Section 2 written by early career and seasoned scholars provides a theoretical foundation for the book Section 3 written by teams of scholars and community partners examines how civic agriculture is unfolding across urban landscapes led largely by community organizations Section 4 written by planning practitioners and scholars documents local government planning tied to urban agriculture focusing especially on how they address questions of equity Section 5 explores UA as a locus of pedagogy of equity Section 6 places the UA movement in the US within a global context and concludes with ideas and challenges for the future The book concludes with a call for planning as public nurturance an approach that can be illustrated through urban agriculture Planning as public nurturance is a value explicit process that centers an ethics of care especially protecting the interests of publics that are marginalized It builds the capacity of marginalized groups to authentically co design and participate in planning policy processes Such a planning approach requires that progress toward equitable outcomes is consistently evaluated through accountability measures And finally such an approach requires attention to structural and institutional inequities Addressing these four elements is more likely to create a condition under which urban agriculture may be used as a lever in the planning and development of more just and equitable cities This is an open access book This is an open access book
