Penguins Lloyd Spencer Davis, Martin Renner, 2010-01-29 This book looks at the penguins an enduringly popular and fascinating group of birds Penguins are associated in the public consciousness with the icecap of the south pole and we are all familiar with images of male Emperor Penguins clustered together through the long night of the Antarctic winter as they incubate the single egg on their feet However several species occur in warmer regions further north in southern Africa South America Australia New Zealand and even the Galapagos All are flightless but are beautifully adapted swimmers and divers and many are able to travel at high speeds on dry land by means of spectacular leaps and belly slides Most species breed in close knit colonies and exhibit a complex system of social behaviour This book looks at all aspects of penguin evolution biology ecology and sociobiology as well as conservation issues affecting the group It is illustrated with line drawings and black and white photographs and has a full colour photographic section **Professor Penguin** Lloyd Spencer Davis, 2014-10-17 Meet Bill Bryson in Antarctica in this engaging book by one of the world's authority on penguins Part memoir partly the research of a field biologist Professor Penguin could be called How Penguins Shaped My Life Based on journals kept during Davis's years of working with penguins in the wild the story takes readers to remote locations Antarctica the Galapagos the deserts of Chile and Peru the Falkland Islands the wild coasts of Argentina and South Africa and New Zealand Davis a world authority on penguins reveals that these box office favourites are not the cute mate for life animals we've been led to believe He also reveals that penguins are a lot like humans sometimes disturbingly so when it comes to their basic needs sex food shelter marriage family and travel Over the years that Davis studies penguins he realises that they are far more complex and nuanced than he imagines at his first encounter They really don't deserve to be seen as so black and

white He expertly marries scientific knowledge with his own anecdotes told with humour hard earned knowledge and insight He also includes stories about those who have helped advance our knowledge of penguins other Professor Penguins Implicit throughout is Davis s philosophy the more we learn about the natural world and specifically penguins the more we learn about ourselves And he asks Is the isolation of Antarctica sufficient to protect penguins from us
