Harrison,2017-10-10 Is a woman's writing different from a man's Many scholars and readers think so even though there has been little examination of the way women's novels enact the theories that women theorists have posited In *Jean Rhys and the Novel as Women's Text* Nancy Harrison makes an important contribution to the exchange of ideas on the writing practice of women and to the scholarship on Jean Rhys Harrison determines what the form of a well made women's novel discloses about the conditions of women's communication and the literary production that emerges from them Devoting the first part of her book to theory and general commentary on Rhys's approach to writing she then offers perceptive readings of *Voyage in the Dark* an early Rhys novel and *Wide Sargasso Sea* Rhys's masterpiece written twenty seven years later She shows how Rhys uses the terms of a man's discourse then introduces a woman's or several women's discourse as a compelling counterpoint that in time becomes prominent and gives each novel its thematic impact In presenting a continuing dialogue with the dominant language and at the same time making explicit the place of a woman's own language Rhys gives us a paradigm for a new and basically moral text Originally published in 1988 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value *Merleau-Ponty and the Art of Perception* Duane H. Davis,William S. Hamrick,2016-03-01 Philosophers and artists consider the relevance of Maurice Merleau Ponty's philosophy for understanding art and aesthetic experience This collection of essays brings together diverse but interrelated perspectives on art and perception based on the philosophy of Maurice Merleau Ponty Although Merleau Ponty focused almost exclusively on painting in his writings on aesthetics this collection also considers poetry literary works theater and relationships between art and science In addition to philosophers the contributors include a painter a photographer a musicologist and an architect This widened scope offers important philosophical benefits testing and providing evidence for the empirical applicability of Merleau Ponty's aesthetic writings The central argument is that for Merleau Ponty the account of perception is also an account of art and vice versa In the philosopher's writings art and perception thus intertwine necessarily rather than contingently such that they can only be distinguished by abstraction As a result his account of perception and his account of art are organic interdependent and dynamic The contributors examine various aspects of this intertwining across different artistic media each ingeniously revealing an original perspective on this intertwining **Clarity** Kim Harrington,2011 *Clarity* Clare Fern sees things no one else can see Things like stolen kisses and long buried secrets All she has to do is touch a certain object and the visions come

to her It s a gift And a curse *Empirical Knowledge in the Eighteenth-Century Novel* Aaron R. Hanlon,2022-11-17 This Element examines the eighteenth century novel s contributions to empirical knowledge Realism has been the conventional framework for treating this subject within literary studies This Element identifies the limitations of the realism framework for addressing the question of knowledge in the eighteenth century novel Moving beyond the familiar focus in the study of novelistic realism on problems of perception and representation this Element focuses instead on how the eighteenth century novel staged problems of inductive reasoning It argues that we should understand the novel s contributions to empirical knowledge primarily in terms of what the novel offered as training ground for methods of reasoning rather than what it offered in terms of formal innovations for representing knowledge We learn from such a shift that the eighteenth century novel was not a failed experiment in realism or in representing things as they are but a valuable system for reasoning and thought experiment *Narrative, Perception, and the Embodied Mind* Lilla Farmasi,2022-09-02 This book encourages cross disciplinary dialogues toward introducing a new framework for neuro narratology expanding on established theory within cognitive narratology to more fully encompass the different faculties involved in the reading process To investigate narrative cognition the book traces the ways in which cognitive patterns of embodiment and the neural connections that comprise them in the reading process are translated into patterns in narrative fiction Drawing theories of episodic memories and nonvisual perception of space Farmasi draws on theories of episodic memories and nonvisual perception of space in analyzing a range of narratives from twentieth century prose The first set of analyses shines a light on perception and emotion in narrative discourses and the construction of storyworlds while the second foregrounds the reader s experience The volume makes the case for the fact that narratives need to be understood as dynamic elements of the interaction between mind body and environment generating new insights and inspiring further research This book will appeal to scholars interested in narrative theory literary studies cognitive science neuroscience and philosophy **Novel Minds** R. Tierney-Hynes,2015-12-11 Eighteenth century philosophy owes much to the early novel Using the figure of the romance reader this book tells a new story of eighteenth century reading The impressionable mind and mutable identity of the romance reader haunt eighteenth century definitions of the self and the seductions of fiction insist on making an appearance in philosophy [Articulating a Thought](#) Eli Alshanetsky,2019-11-28 Articulating a thought can be astoundingly easy We generally have no trouble expressing complex ideas that we have never considered before though not always Articulating a thought can also be extremely hard Our difficulties in articulating thoughts pervade many aspects of philosophical inquiry as well as many ordinary situations While we may overcome some of the challenges through education and practice we cannot do away with them altogether And the hardest thoughts to articulate often come to us unbidden as we neither assemble them from other thoughts nor get them from any source of external information They can come from us freely and spontaneously and frequently we articulate them in order to find out what they are In many cases we would not bother articulating our

thoughts if we already had this knowledge yet when we find the right words we can often instantly tell that they express our thought How do we manage to recognize the formulations of our thoughts in the absence of prior knowledge of what we are thinking And why is it that producing a public language formulation contributes in any way to the deeply private undertaking of coming to know our own thoughts In *Articulating a Thought* Eli Alshanetsky considers how we make our thoughts clear to ourselves in the process of putting them into words and examines the paradox of those difficult cases where we do not already know what we are struggling to articulate

Contemporary Literature and the End of the Novel P.

Vermeulen,2015-01-06 This book explores the paradoxical productivity of the idea of the end of the novel in contemporary fiction It shows how this idea allows some of our most significant twenty first century writers to re imagine the ethics and politics of literature and to figure intractable forms of life and affect

Russomania Rebecca Beasley,2020-03-31

Russomania Russian Culture and the Creation of British Modernism provides a new account of modernist literature s emergence in Britain British writers played a central role in the dissemination of Russian literature and culture during the early twentieth century and their writing was transformed by the encounter This study restores the thick history of that moment by analyzing networks of dissemination and reception to recover the role of neglected as well as canonical figures and institutions as well as individuals The dominant account of British modernism privileges a Francophile genealogy but the turn of the century debate about the future of British writing was a triangular debate a debate not only between French and English models but between French English and Russian models Francophile modernists associated Russian literature especially the Tolstoyan novel with an uncritical immersion in life at the expense of a mastery of style and while individual works might be admired Russian literature as a whole was represented as a dangerous model for British writing This supposed danger was closely bound up with the politics of the period and this book investigates how Russian culture was deployed in the close relationships between writers editors and politicians who made up the early twentieth century intellectual class the British intelligentsia *Russomania* argues that the most significant impact of Russian culture is not to be found in stylistic borrowings between canonical authors but in the shaping of the major intellectual questions of the period the relation between language and action writer and audience and the work of art and lived experience The resulting account brings an occluded genealogy of early modernism to the fore with a different arrangement of protagonists different critical values and stronger lines of connection to the realist experiments of the Victorian past and the anti formalism and revived romanticism of the 1930s and 1940s future

Book Review Digest, 1927 *Voices, Visions, and a New Reality* J. Ann Duncan, 2010-11-23 This book introduces to a larger audience the work of a group of Mexican writers whose work reflects the stimulus of the boom of the 1960s especially in the experimental nueva novella Duncan views the work of six writers in the context of more well known writers of the period Ruflo Fuentes and Del Paso and concludes with a chapter on other recent innovators in Mexican literature Despite their diversity these texts share many common features and unlike social realism the works are not openly political but at the same time they question assumptions about reality itself and the relation of fiction to truth
