Perfect Simulation Monographs Statistics Probability:

Perfect Simulation Mark L. Huber, 2015-12-08 Perfect simulation methods also known as perfect sampling methods are algorithms that draw random variates from complex physical and statistical models These methods are used in MCMC simulation to create samples exactly from the target distribution giving more accurate results This book is among the first to synthesize all research in this area into a unified framework including work from statistics physics and computer science The book covers all the key algorithms and includes detailed worked examples of real applications

Hierarchical Modeling and Analysis for Spatial Data Sudipto Banerjee, Alan E. Gelfand, Bradley P. Carlin, 2025-09-23 Hierarchical Modeling and Analysis for Spatial Data Third Edition is the latest edition of this popular and authoritative text on Bayesian modeling and inference for spatial and spatial temporal data The text presents a comprehensive and up to date treatment of hierarchical and multilevel modeling for spatial and spatio temporal data within a Bayesian framework Over the past decade since the second edition spatial statistics has evolved significantly driven by an explosion in data availability and advances in Bayesian computation This edition reflects those changes introducing new methods expanded applications and enhanced computational resources to support researchers and practitioners across disciplines including environmental science ecology and public health Key features of the third edition A dedicated chapter on state of the art Bayesian modeling of large spatial and spatio temporal datasets Two new chapters on spatial point pattern analysis covering both foundational and Bayesian perspectives A new chapter on spatial data fusion integrating diverse spatial data sources from different probabilistic mechanisms An accessible introduction to GPS mapping geodesic distances and mathematical cartography An expanded special topics chapter including spatial challenges with finite population modeling and spatial directional data A thoroughly revised chapter on Bayesian inference featuring an updated review of modern computational techniques A dedicated GitHub repository providing R programs and solutions to selected exercises ensuring continued access to evolving software developments With refreshed content throughout this edition serves as an essential reference for statisticians data scientists and researchers working with spatial data Graduate students and professionals seeking a deep understanding of Bayesian spatial modeling will find this volume an invaluable resource for both theory and practice

Markov Chain Monte Carlo W. S. Kendall, Faming Liang, 2005 Markov Chain Monte Carlo MCMC originated in statistical physics but has spilled over into various application areas leading to a corresponding variety of techniques and methods That variety stimulates new ideas and developments from many different places and there is much to be gained from cross fertilization This book presents five expository essays by leaders in the field drawing from perspectives in physics statistics and genetics and showing how different aspects of MCMC come to the fore in different contexts The essays derive from tutorial lectures at an interdisciplinary program at the Institute for Mathematical Sciences Singapore which exploited the exciting ways in which MCMC spreads across different disciplines

Probabilistic Foundations of Statistical Network Analysis Harry

Crane,2018-04-17 Probabilistic Foundations of Statistical Network Analysis presents a fresh and insightful perspective on the fundamental tenets and major challenges of modern network analysis Its lucid exposition provides necessary background for understanding the essential ideas behind exchangeable and dynamic network models network sampling and network statistics such as sparsity and power law all of which play a central role in contemporary data science and machine learning applications The book rewards readers with a clear and intuitive understanding of the subtle interplay between basic principles of statistical inference empirical properties of network data and technical concepts from probability theory Its mathematically rigorous yet non technical exposition makes the book accessible to professional data scientists statisticians and computer scientists as well as practitioners and researchers in substantive fields Newcomers and non quantitative researchers will find its conceptual approach invaluable for developing intuition about technical ideas from statistics and probability while experts and graduate students will find the book a handy reference for a wide range of new topics including edge exchangeability relative exchangeability graphon and graphex models and graph valued Levy process and rewiring models for dynamic networks The author s incisive commentary supplements these core concepts challenging the reader to push beyond the current limitations of this emerging discipline With an approachable exposition and more than 50 open research problems and exercises with solutions this book is ideal for advanced undergraduate and graduate students interested in modern network analysis data science machine learning and statistics Statistical Inference and Simulation for Spatial Point Processes

Jesper Moller,Rasmus Plenge Waagepetersen,2003-09-25 Spatial point processes play a fundamental role in spatial statistics and today they are an active area of research with many new applications Although other published works address different aspects of spatial point processes most of the classical literature deals only with nonparametric methods and a thorough treatment of the theory and applications of simulation based inference is difficult to find Written by researchers at the top of the field this book collects and unifies recent theoretical advances and examples of applications The authors examine Markov chain Monte Carlo algorithms and explore one of the most important recent developments in MCMC perfect simulation procedures **Nonparametric Models for Longitudinal Data** Colin O. Wu,Xin Tian,2018-05-23
