Chris Arts,Jan Geurts,2016-10-25 Management of Periprosthetic Joint Infections PJIs Management of PJIs discusses periprosthetic joint infection PJI a fairly rare occurrence that is nonetheless one of the most serious complications in joint replacement surgery Intricate interactions between the pathogen the host and the implant can result in PJIs which are not only physically devastating for the patient but also financially crippling for health authorities and insurance companies Actions taken to minimize the risk of PJIs can be extremely challenging for the orthopaedic community Consequently new research which is detailed in this comprehensive
