Building Multimodal Generative AI and Agentic Applications Indrajit Kar, 2025-10-27

DESCRIPTION Generative AI and agentic AI are reshaping how we interact with data enabling intelligent systems that can reason generate and autonomously act across multiple modalities From text and images to voice and structured data these technologies are increasingly essential in enterprise and research applications today This book offers a complete roadmap to mastering multimodal generative AI and agentic AI systems It covers foundational concepts vision language models retrieval augmented generation human in the loop and multi agent workflows text to SQL OCR and hybrid AI integrations Each chapter combines theory practical guidance code implementations and real world case studies helping readers understand

architectures pipelines and production grade deployments By the end of this book readers will be capable of designing implementing and scaling robust multimodal and agentic AI systems They will gain hands on expertise in reasoning generation retrieval agent orchestration and Ops equipping them to build production ready AI applications and excel in their roles

WHAT YOU WILL LEARN Understand multimodal generative AI and agentic AI systems Architecting RAG vector DBs embeddings cross encoders and core agentic planning Build retrieval augmented generation workflows efficiently Implement human in the loop and multi agent pipelines Apply text to SQL for real time data queries Develop OCR solutions for images and documents Integrate traditional ML models with GenAI workflows Deploy production grade AI with monitoring and observability

WHO THIS BOOK IS FOR This book is for AI enthusiasts data scientists ML engineers and software developers with foundational Python and ML knowledge It is ideal for tech leads researchers and enterprise architects aiming to build and scale multimodal production grade agentic AI systems
