needed to thrive in the evolving economic landscape with ChatGPT's Money Making Secrets *Generative Systems and Intelligent Tutoring Systems* Sabine Graf, Angelos Markos, 2025-07-28 This book constitutes the refereed proceedings of the 21st International Conference on Intelligent Tutoring Systems ITS 2025 held in Alexandroupolis Greece during June 2-6 2025. The 21 full papers, 27 short papers and 5 posters included in this book were carefully reviewed and selected from 67 submissions. The papers are organized in the following topical conference tracks: Part I: Generative Tutoring Systems. The goal of this part is to show how new techniques inspired by artificial intelligence (AI) and new methods in education can improve learning, teaching and generate the capacity for knowledge acquisition and much more. Part II: Application areas, environments and techniques for AI systems. This part shows the progress of research investigating the different application areas such as education, health, techniques such as neural networks, data mining, natural language processing and environments such as games, virtual reality, cognitive robots for effective AI systems.

Neural Network Advancements in the Age of AI Benziane, Sarah, Guerroudji Meddah, Fatiha, 2025-05-29 Emerging trends such as explainable artificial intelligence (XAI), few-shot learning and neural architecture search (NAS) push the boundaries of current neural networks. These cutting-edge networks are transforming the design and efficiency in modern applications including computer vision, natural language processing (NLP) and autonomous systems. They enable engineers and data scientists to design efficient models accelerating innovation in sectors like healthcare, biotechnology and smart systems. The practical implementation techniques of these advanced neural networks are ideal for optimizing neural networks in real-world scenarios and solving real-world problems. *Neural Network Advancements in the Age of AI* provides a comprehensive exploration of neural networks emphasizing both the theoretical foundations and practical applications across various fields. It bridges the gap between theory and practice making neural networks accessible to both researchers and practitioners. Covering topics such as machine translation, predictive maintenance and skill acquisition, this book is an excellent resource for AI engineers, data scientists, software developers, healthcare professionals, financial practitioners, engineers, computer scientists, professionals, researchers, scholars, academicians and more.

AI-Driven Sustainability Joanna Rosak-Szyrocka, Radosław Wolniak, 2025-11-25 *AI-Driven Sustainability: The Future of Human Resources Management* is an interdisciplinary publication that demonstrates the artificial intelligence phenomenon or AI in the sustainable shaping of human resources management. The role of AI as a support to the existing HR processes and a comprehensive changer of organizational, ethical, social and environmental values is reviewed by authors. By providing readers with the wide scale of explanatory case studies among global business corporations and with a thorough review of law, ethical and technological issues in 10 chapters, the book suggests a green model of AI implementation in HR dimensions. A must-read publication for researchers, practitioners and leaders who want to make their business part of the conscious future in labor in the environment of digitalization.
