we the everyday people whose data powers AI aren't actually in control of anything. When for example we speak with Alexa we contribute that data to a system we can't see and have no input into one largely free from regulation or oversight. The big nine corporations Amazon, Google, Facebook, Tencent, Baidu, Alibaba, Microsoft, IBM, and Apple are the new gods of AI and are short-changing our futures to reap immediate financial gain. In this book Amy Webb reveals the pervasive invisible ways in which the foundations of AI, the people working on the system, their motivations, the technology itself is broken. Within our lifetimes AI will by design begin to behave unpredictably, thinking and acting in ways which defy human logic. The big nine corporations may be inadvertently building and enabling vast arrays of intelligent systems that don't share our motivations, desires, or hopes for the future of humanity. Much more than a passionate human-centered call to arms, this book delivers a strategy for changing course and provides a path for liberating us from algorithmic decision makers and powerful corporations.
