E-Pedagogy for the Digital Age Dr. P. C. Nagasubramani, Adult learners have more options for enrolling in postsecondary education than ever before and they are able to use their learning style preference in deciding which program best meets their needs For some of these students those programs are fully online and for others there is minimal use of technology As technology grows and become more integrated into individual lives the unique learning styles and preferences of adults need to learn to be incorporated into instructional design Drawing on a regional sample of US colleges 545 adult learners in a graduate programs were surveyed about how to effectively build community in their online classes Results indicated some agreement with these instructional tools Mature adult learners however were found to have stronger agreement with strategies that included work outside of the formal online class These results suggest perhaps a greater comfort for adults in working in spaces where there is less likelihood of being judged or graded and that they might value relational work with other students in different ways than younger adults

Computational Analysis and Deep Learning for Medical Care Amit Kumar Tyagi, 2021-08-24 The book details deep learning models like ANN RNN LSTM in many industrial sectors such as transportation healthcare military agriculture with valid and effective results which will help researchers find solutions to their deep learning research problems We have entered the era of smart world devices where robots or machines are being used in most applications to solve real world problems These smart machines devices reduce the burden on doctors which in turn make their lives easier and the lives of their patients better thereby increasing patient longevity which is the ultimate goal of computer vision Therefore the goal in writing this book is to attempt to provide complete information on reliable deep learning models required for e healthcare applications Ways in which deep learning can enhance healthcare images or text data for making useful decisions are discussed Also presented are reliable deep learning models such as neural networks convolutional neural networks

backpropagation and recurrent neural networks which are increasingly being used in medical image processing including for colorization of black and white X ray images automatic machine translation images object classification in photographs images CT scans character or useful generation ECG image caption generation etc Hence reliable deep learning methods for the perception or production of better results are a necessity for highly effective e healthcare applications Currently the most difficult data related problem that needs to be solved concerns the rapid increase of data occurring each day via billions of smart devices To address the growing amount of data in healthcare applications challenges such as not having standard tools efficient algorithms and a sufficient number of skilled data scientists need to be overcome Hence there is growing interest in investigating deep learning models and their use in e healthcare applications Audience Researchers in artificial intelligence big data computer science and electronic engineering as well as industry engineers in transportation healthcare biomedicine military agriculture
