Good Meal Prep Ideas For Beginners and Dummies Barbara Dawson,2020-08-18 Meal prepping is making a meal or recipe then portioning it out to grab and go meals for later If you've ever kept your leftovers from dinner to take with you for lunch then next day you've already mini meal prepped Generally though meal prepping refers to making 3-7 days worth of food at a time Think of it like making your lunches for the week all at once instead of making your lunch every day You can use this same technique for breakfast lunch dinner and snacks Meal prepping involves no waste and reduces time to eat outside your home whether that's at work or a budget When considering a day with the question of making meals without having to do it each day to return to meal prepping not for everyone It is good for the value convenience and often more than that With meal prepping you generally eat the same thing for a few days in a row so if you don't like leftovers or get bored with food meal prepping isn't for you If having nutritious food while maximizing your time and budget is important to you then doing something different every day meal prepping is usually a good idea generally not seen as meal prep for the individual or maybe one other person doing a whole family Meal prepping for a whole family would be quite difficult but there are many things that would make it a more manageable task if food is stored in the refrigerator for a slow day in the week In addition to the way food is packed the individual nuances of your refrigerator can impact the usefulness of refrigerated meals So the level of acceptable health and texture and flavor will be subjective to the eater Always begin with the refrigerator guidelines but the FDA and then follow them given your own preferences In general it is not more than a few days worth of food that you can find that is that fresh food usually lasts for a few days
