Why Don't Lenders Renegotiate More Home Mortgages? Manuel Adelino,2011 This is a print on demand edition of a hard to find publication Servicers have been reluctant to renegotiate mortgages since the foreclosure crisis started in 2007 having performed payment reducing modifications on only 3% of seriously delinquent loans This reluctance does not result from securitization Servicers renegotiate similarly small fractions of loans that they hold in their portfolios The paper s results are robust to different definitions of renegotiation including the one most likely to be affected by securitization and to different definitions of delinquency Redefault risk the possibility that a borrower will still default despite costly renegotiation and self cure risk the possibility that a seriously delinquent borrower will become current without renegotiation make renegotiation unattractive to investors Illus **J.K.
