uniquely visible and significant in these years as a result of a widely perceived crisis in literary valuation. In a set of case studies it analyses the relations between literary value, meaning and textual materiality in print artefacts such as newspapers, magazines and book genres, artefacts that gave form to both literary works and the journalistic content: critical essays, book reviews, celebrity profiles and advertising, through which conflicting conceptions of literature took shape. In the process it corrects two available misperceptions about reading in the period: that books were the default mode of reading and that experimental modernism was the sole literary aesthetic that could usefully represent modern life. **Educart CBSE**
