[AI Aesthetics](#) Jan-Noël Thon,Lukas R.A. Wilde,2025-09-09 This volume investigates the intersection of generative AI and media aesthetics from an

interdisciplinary perspective Combining in depth theoretical reflection with a diverse selection of case studies its authors explore the aesthetic forms of AI generated medial objects as well as the cultural imaginaries that the latter draw upon Bringing together a group of scholars from various geographic and disciplinary backgrounds the chapters move within and across different conceptualizations of AI aesthetics that can be located in between an aesthetics as artistics that is primarily concerned with aesthetic judgments related to skill and connoisseurship and an aesthetics as aisthetics that identifies all kinds of embodied perception as its object The book thus reflects on both the theoretical and the methodological implications of AI aesthetics while also demonstrating that this is still very much an emerging research field and that no dominant conceptualization of AI aesthetics has yet emerged Considering its decidedly international and interdisciplinary scope *AI Aesthetics AI Generated Images between Artistics and Aisthetics* will appeal to scholars and students within media studies cultural studies literary studies philosophy art history visual culture studies digital humanities and critical AI studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

The AI Revolution Daniel Vargas-Gomez, 2025-09-26 This book examines AI's transformative impact on creativity blending insights from economics media studies and technology to analyze its role in the arts and the broader creative industries AI challenges the way we relate and use technology as well as expand how we think of technological progress overall Structured in three parts the book first rethinks creativity as an inclusive collaborative process through theories like Actor Network Theory arguing AI is a new form of agency within creative networks It explores the economic drivers of AI adoption citing industry forecasts long term trends and the rise of what sociologist Richard Florida calls the Creative Class Through critical analysis of the gaps between the rhetoric and realities of AI the text advocates for Augmented Creativity as the right approach to balance human AI collaboration Lastly the book studies pragmatic scenarios for 2035 focusing on job shifts AI generated content and artistic experimentation avoiding speculative AI hype By grounding debates in real world impacts the book urges a critical yet nuanced view of AI that ensures it remains a potential agent for collaboration rather than a replacement of human skill and imagination
