In Case of Emergency Elizabeth Ellcessor,2022-04-19 A much needed look at the growth of emergency media and its impact on our lives In an emergency we often look to media to contact authorities to get help to monitor evolving situations or to reach out to our loved ones Sometimes we aren t even aware of an emergency until we are notified by one of the countless alerts alarms notifications sirens text messages or phone calls that permeate everyday life Yet most people have only a partial understanding of how such systems make sense of and act upon an emergency In Case of Emergency argues that emergency media are profoundly cultural artifacts that shape the very definition of emergency as an opposite of normal Looking broadly across a range of contemporary emergency related devices practices and services Elizabeth Ellcessor illuminates the cultural and political underpinnings and socially differential effects of emergency media By interweaving in depth interviews with emergency operation and app development experts archival materials and discursive and technological readings of hardware and infrastructures Ellcessor demonstrates that emergency media are powerful components of American life that are rarely if ever neutral The normalization of ideologies produced and reinforced by emergency media result in unequal access to emergency services and discriminatory assumptions about who or what is a threat and who deserves care and protection As emergency media undergo massive growth and transformation in response to digitization and attendant entrepreneurial cultures Ellcessor asks where access equity and accountability fit in all of this The first book to develop a typology of emergency media In Case of Emergency opens a much needed conversation around the larger cultural meanings of emergency and what an ethical and care based approach to emergency could entail

Chronicles of Care: A Design History of the COVID-19 Virus Paul A. Rodgers, Fernando Galdon, Craig Bremner, 2024-04-16 The Covid 19 crisis and the designed interventions that the authors have catalogued in this book prove definitively that design does care The authors documented this as it evolved every day from the 1st January 2020 to 31st May 2020 inclusive Then they looked at all of this care and caring from the point of view of design and by the sheer volume of design interventions they have documented illustrate that design is good in a crisis What the Covid 19 pandemic illustrated is that for the first time in modern history capital was totally irrelevant Money could not save your life Only design could Rapidly designed masks shelters hospitals instructional posters infographics dashboards respirators sanitisers virtual and local communities emerged to save us From January 2020 design became king The Covid 19 global pandemic presented an ontological reality design is more than margins or profit In fact design became extremely valuable when it stopped concentrating on those things and started to care about peoples lives This brief episode in history is still repositioning the status of design and reconfiguring its signifier from consumption to care The contents of this book cover the outbreak lockdown and the beginning of the reopening in the UK In between the book functions as a history of pandemic crisis design interventions As such it is a research in the moment project where we have illustrated our thoughts and insights in tables charts and diagrams We have accepted all design interventions as valid and given them the same role and status by presenting each of them in a standard format No curation No selection No position The task of critical analysis must follow perhaps by us certainly by others
