Project Independence Blueprint United States. Federal Energy Administration, 1974 What is Project Independence The sources and uses of energy in the United States have changed dramatically in the last several decades As a result in just one generation we have shifted from a position of domestic energy abundance to a substantial and continually growing reliance on foreign energy sources Project Independence is a wide ranging program to evaluate this growing dependence on foreign sources of energy and to develop positive programs to reduce our vulnerability to future oil cut offs and price increases Energy and Water Development Appropriations for 2006 United States. Congress. House. Committee on Appropriations. Subcommittee on Energy and Water Development, 2005 **The Modernisation of State Aid for Economic and Social Development** Bruno Nascimbene, Alessia Di Pascale, 2018-11-28 This book analyses the recent modernisation of EU State aid law from various perspectives and considers both substantive and procedural aspects It also discusses the reasons for and the goals and future implications of the modernisation programme including the evolution of the concept of State aid The ambitious reform programme was launched in 2012 and has now been almost fully implemented

by virtue of the adoption of new rules of procedure in July 2013 and exemption in June 2014 The book highlights the main aspects of this sector reform which include the Commission's change of attitude towards so called positive aid i.e. those able to promote economic growth and the intention to focus on matters of greater systematic extent These objectives also imply a third aspect increasing the intensity of the control powers conferred on the Commission with regard to that aid that prove to be harmful to competition and the internal market The book also examines the greater responsibility given to States for self assessment of their economic policy measures and explores the resulting impact on and challenges posed to the administrations of the Member States The book's second part is devoted to the application State aid rules in the area of services of general economic interest with a special focus on aid in the field of social health and infrastructure

Subcommittee on Energy and Water, and Related Agencies, 2005

Low Carbon Politics David Toke, 2018-03-26 Low Carbon Politics focuses on how policies and institutions have influenced the deployment of renewable energy and nuclear power in the electricity sector Cultural theory is used to analyse this Egalitarian pressures have had a profound influence on technological outcomes not merely in securing the deployment of renewable energy but also in increasing the costs of nuclear power Whereas in the 1970s it might have been expected that individualist market based pressures allied to dominant hierarchies would deliver nuclear power as the main response to problems associated with fossil fuels a surprising combination has emerged Egalitarian and individualist pressures are together leading to increasing levels of deployment of renewable energy This work finds that electricity monopolies tend to favour nuclear power whereas competitive arrangements are more likely to lead to more renewable energy being deployed It covers developments in a number of countries including USA UK China South Africa and also Germany and Denmark This book will be of great relevance to students academics and policymakers with an interest in energy policy low carbon politics and climate change **Federal Register**, 2013-09 **Study of the Savings and Loan Industry** Irwin Friend, 1969 *Popular Mechanics*, 1984-09 Popular Mechanics inspires instructs and influences readers to
