**Young Children's**

**Rights in a Digital World** Donell Holloway, Michele Willson, Karen Murcia, Catherine Archer, Francesca Stocco, 2021-08-19

This volume focuses on very young children's aged 0-8 rights in a digital world. It gathers current research from around the globe that focuses on young children's rights as agential citizens to the provision of and participation in digital devices and content as well as their right to protection from harm. The UN Digital Rights Framework of 2014 addresses children's needs, agency and vulnerability to harm in today's digital world and implies roles and responsibilities for a variety of social actors including the state, families, schools, commercial entities, researchers and children themselves. This volume presents a broad range of research including chapters on parental supervision and control, the changing forms of play, early childhood education, media and cultural studies, law, design, health, special needs education and engineering. Implicit within this book is the acknowledgement that children of various ages, abilities, socioeconomic and geographic backgrounds should have equal access to and positive, non-harmful experiences with new digital technologies and content as well as adult support and expertise that enhances these experiences. This passionate book celebrates the diversity of young children's activities in the digital world. It interrogates these through four intersecting lenses: their rights, play, experiences, contextualised design and best practice. Balancing children's eager engagement with digital content alongside adult responsibilities for education, privacy and protection, the volume provides a fitting showcase for work of global relevance. Professor Lelia Green, Professor of Communications, Edith Cowan University, Perth, Western Australia. This compelling text provides a critical resource to inform our understanding of the intersection of the digital world and children's rights. Ilene R. Berson, Ph.D., Professor of Early Childhood Education, Affiliate Faculty, Learning Design Technology Area Coordinator, Early Childhood Coordinator, Early Childhood Ph.D. Program, University of South Florida, College of Education. A truly international collection that investigates young children's engagement with digital technologies. Identifying issues of public interest around digital practices, this highly readable book is a valuable resource for researchers, parents and policy makers.
