The Membership Economy (PB) Robbie Kellman Baxter,2015-03-20 The membership business models of Netflix Weight Watchers and other industry giants revealed and how you can use them to lead your company to the top of the food chain For decades consumers and businesses have joined clubs bought products and accessed services using a subscription model But it has only been in recent years that the model has been transformed and perfected through massive changes in technology The Membership Economy shows how nimble companies that focus on ongoing formal relationships over one time transactions are thriving By renting lending or offering access instead of just ownership organizations can leapfrog industry leaders In terms of strategic business models this is one that allows for breakthrough growth With great case studies from American Express LinkedIn CrossFit SurveyMonkey and more this book will show you how to radically rethink how your organization can build loyalty viral growth and recurring revenue [Impact of FinTechs on the Banking Sector. Competitor or Partner for Traditional Banks?](#) Alice Hofmann,2021-06-29 Bachelor Thesis from the year 2018 in the subject Business economics Banking Stock Exchanges Insurance Accounting grade 1 0 University of Applied Sciences Essen language English abstract This paper will analyse if traditional banks deal with the continuous digitization and new technology based competitors especially FinTechs as a threat or rather as a chance for their own business model Is it more likely that banks and FinTechs will link up as partners to benefit from mutual competitive advantages or will it degenerate into a battle for power and market share Furthermore why is it that small start ups can present such a threat to established banks that have been operating for years

Innovative start ups revolutionized several business sectors There was Napster for the music industry Uber for the taxi industry and there are FinTechs for the financial sector FinTech is an abbreviation for Financial Technology The designation itself already gives an idea of what their business idea looks like Intelligent technologies and the continuously expanding digitization across all business sectors expands the customers needs and demands towards banks They want to take care of banking business as easily and convenient as they order goods via Amazon ask Google for the way or stream music and movies online via Spotify or Netflix FinTech has recognized that change in customer behaviour and started to build their business models based on these findings Those new innovative market entrants are present in every part of the value chain of a traditional bank offering alternative financial products and services on a purely online basis Traditional banks are therefore facing significant challenges and risks that are endangering their competitiveness **Taking Charge with Value**
