The Dream Hacker Timothy Benson, 2018-08-13 Your dreams belong to you They're private and no one needs to know what happens in them But what if someone could invade your dreams And once in what if that someone could control what happens while you lie there powerless to affect the outcome Dylan Ward can do that Struggling to make partner in a law firm and finding it hard to hold on to a romantic relationship his nightly dreams become his escape into a world that seems far happier than his real one When he learns about the phenomenon of lucid dreaming where the sleeping person is actually conscious of the events in the dream he immerses himself in an attempt to master it Soon his nights are filled with fun and adventure where he has the power to control events and find temporary relief from his mundane life That relief soon pales when he reads an old legend about dream sharing that leads him to the idea of entering and controlling the dreams of others

What starts out as an interesting experiment soon turns into an obsession of hacking into the dreams of the people in his life He begins a strange quest for vengeance power love and all the things that are missing from his real world But its when he devises a way to teach other people how to invade dreams that the dangers of his obsession become frighteningly clear The Dream Hacker moves between imagination and reality along the hazy sleeping path that everyone travels but cant really navigate Mixing equal parts of dark humor and the angst of modern culture the story challenges our notions of understanding what is real and asks just how far a person will go to change the course of his life *Sensehacking* Charles Spence,2021-01-14 The world expert in multisensory perception on the remarkable ways we can use our senses to lead richer lives Talks total sense lots of fun facts right up there with the best of the best Chris Evans Packed with studies on pain attention memory mood The Times How can the furniture in your home affect your wellbeing What colour clothing will help you play sport better And what simple trick will calm you after a tense day at work In this revelatory book pioneering and entertaining Oxford professor Charles Spence shows how our senses change how we think and feel and how by hacking them we can reduce stress become more productive and be happier We like to think of ourselves as rational beings and yet it s the scent of expensive face cream that removes wrinkles temporarily a room actually feels warmer if you use a warmer paint colour and the noise of the crowd really does affect the referee s decision Understanding how our senses interact can produce incredible results This is popular science at its unbelievable best Spence does for the senses what Marie Kondo does for homes Avery Gilbert author of What the Nose Knows Everything you need to know about how to cope with the hidden sensory overload of modern life engagingly told Robin Dunbar author of How Many Friends Does One Person Need

Hacking Neuroplasticity Joyce Shaffer,2024-11-29 Neuroplasticity is the ability of neural networks in the brain to change through growth and reorganization It is when the brain is rewired to function in some way that differs from how it previously functioned How does aging affect neuroplasticity As we grow older plasticity decreases to stabilize what we have already learned What influence does the aging process have on memory Forgetfulness can be a normal part of aging As people get older changes occur in all parts of the body including the brain As a result some people may notice that it takes longer to learn new things they don t remember information as well as they did or they lose things like their glasses This book on evolving neuroscience is unique in its lifespan focus on driving neuroplasticity in a positive direction to influence the Flynn effect of increasing human intelligence as the preferred way to prevent delay onset and or reverse dementia It considers potential impact from the first moments of life through end of life It includes intergenerational activities Its inclusion of centenarians and supercentenarians provides examples of Super Agers who have maintained and or increased neurocognitive capacity often with a health span that approximated their vigorous longevity It discusses the use of the Artificial Intelligence AI revolution to refine personalize and broaden our global reach to enhance the Flynn effect as the preferred effort to improve global statistics on neurocognitive functioning at any age Driving neuroplasticity in a positive direction at all ages is
