PTSD and the Return from the Front Pasquale De Marco, 2025-07-07 This book provides a comprehensive overview of the psychological effects of combat and the resources available to help veterans cope with these effects The book is divided

into ten chapters each of which covers a different topic related to combat and mental health. The first chapter provides a general overview of the psychological effects of combat. The second chapter discusses the history of PTSD and the different ways it can be treated. The third chapter examines the role of the media in shaping public understanding of combat and mental health. The fourth chapter discusses the legal implications of combat-related mental health problems. The fifth chapter explores the impact of combat on family relationships. The sixth chapter examines the role of community organizations in supporting veterans' recovery. The seventh chapter discusses the future of combat-related mental health research and treatment. The eighth chapter examines the use of art to express the experience of combat. The ninth chapter explores the role of spirituality in recovery from combat-related mental health problems. This book is intended for a general audience. It is written in a clear and concise style and it does not require any prior knowledge of mental health or military service. The book is intended to be informative and helpful and it is hoped that it will provide readers with a better understanding of the psychological effects of combat and the resources available to help veterans cope with these effects. This book is an essential resource for veterans, their families, and anyone who wants to better understand the psychological effects of combat. The book provides a comprehensive overview of the different mental health problems that veterans may face, as well as the different treatments and resources that are available to help them cope. The book is also a valuable resource for anyone who wants to learn more about the psychological effects of combat and the challenges that veterans face when they return home. If you like this book, write a review on Google Books.

Return and Regaining Pasquale De Marco, 2025-07-25. The transition from military to civilian life can be a challenging one. Veterans often face a number of challenges, including reintegrating into society, finding a job, and dealing with the emotional and psychological wounds of war. This book is designed to help veterans navigate these challenges and build a successful and fulfilling life after service. In this book, you will find information and advice on a variety of topics, including:

- Re-entry: Navigating the transition from military to civilian life.
- Identity and Purpose: Rediscovering who you are after war.
- Relationships and Connections: Rebuilding relationships with family and friends.
- Trauma and Healing: Understanding the impact of trauma and finding ways to cope and heal.
- Health and Wellness: Maintaining physical and mental health after service.
- Career and Education: Finding a job or starting a career and going back to school or getting further education.
- Community and Service: Giving back to the community and making a difference in the world.
- Growth and Transformation: Learning from your experiences and becoming a better person after war.
- Legacy and Impact: The long-term effects of your service and making a difference in the lives of others.
- Triumph and Resilience: Overcoming adversity and achieving success.

This book is written by a veteran for veterans. The author understands the challenges that veterans face, and he offers practical advice and support. This book is a valuable resource for any veteran who is looking to build a successful and fulfilling life after service. This book is not a substitute for professional help. If you are struggling with the transition to civilian life, please seek help from a qualified mental health professional. If you like this book, write a review.

The Mind of Everyday Petraq Papajorgji, Howard Moskowitz, 2024-12-28 The advent of artificial intelligence AI is associated with relevant changes in how we live today AI has the potential to significantly enhance daily decision making by providing tailored data dependent insights and aiding in intricate analysis AI based systems will be around us helping and advising us in our everyday tasks However how well do these systems perform in their quest to replace the human brain A meter a procedure for comparing the outcomes obtained by artificial intelligence systems with those obtained by human systems is necessary to address this issue This meter is Mind Genomics a new emerging science that delves into the science of how we as humans organize and respond to information To evaluate whether there are differences in the results obtained by AI based systems and human based experiments based on Outer Psychophysics were designed and implemented Thus four experiments in crucial areas of our lives are selected and cover education family stress and environmental and governmental policies For each area a Mind Genomic experiment is designed defining four topics silos Then the elements contained in each of the silos were generated twice once by humans and then by an AI based system Evaluating both systems performance requires comparing the results obtained by both experiments The analysis of the study cases is disciplined rich in scientific tools and presented with methods Through a blend of theoretical exploration case studies and practical applications this book aims to inspire readers with the potential of the fusion of Mind Genomics and AI to empower innovation enhance user experiences and bring forth a more nuanced understanding of human thought Whether the reader is a student a researcher in the field of social and political sciences or simply curious about the evolving landscape of science and technology we hope this book will serve as an invitation to explore how we can harmonize human and machine intelligence to better navigate the complex world around us

The Question of Artificial Intelligence Brian P. Bloomfield, 2018-05-15 Originally published in 1987 when Artificial Intelligence AI was one of the most hotly debated subjects of the moment there was widespread feeling that it was a field whose time had come that intelligent machines lay just around the corner Moreover with the onset of the revolution in information technology and the proclamation from all corners that we were moving into an information society developments in AI and advanced computing were seen in many countries as having both strategic and economic importance Yet aside from the glare of publicity that tends to surround new scientific ideas or technologies it must be remembered that AI was a relative newcomer among the sciences that it had often been the subject of bitter controversy and that though it had been promising to create intelligent machines for some 40 years prior to publication many believe that it had actually displayed very little substantive progress With this background in mind the aim of this collection of essays was to take a novel look at AI Rather than following the path of old well trodden arguments about definitions of intelligence or the status of computer chess programs the objective was to bring new perspectives to the subject in order to present it in a different light Indeed instead of simply adding to the endless wrangling for and against AI the source of such divisions is made a topic for analysis in its own right Drawing on ideas from the philosophy and sociology of scientific knowledge this collection therefore broke new ground Moreover although a great deal had been written about the social and cultural impact of AI little had been said of the culture of AI scientists themselves including their discourse and style of thought as well as the choices judgements negotiations and competitive struggles for resources that had shaped the genesis and development of the paradigmatic structure of their discipline at the time Yet sociologists of science have demonstrated that the analysis of factors such as these is a necessary part of understanding the development of scientific knowledge Hence it was hoped that this collection would help to redress the imbalance and provide a broader and more interesting picture of AI

Keith,2015-07-29 This book is revolutionary in intent and is in many ways quite an uncommon work It is iconoclastic as it goes about dislodging roots It attempts to release the stigmatized Other from entrapment by rationalism and modern liberalism The stigmatized Other are legendarily marginalized from congenial social relations with mainstream society They include peoples of color women gays and lesbians among others Entrapment through misrecognition is captured via marked contrasts existing between two major liberal configurations modern liberalism and pragmatism Accordingly the book is tasked with overcoming the systemic constraints placed upon the stigmatized Other to conform when such a demand runs disastrously counter to their inherently irrefragable self definition Conformity is reductionist beholden to dyadic forms of thinking which impose a singular mathematically derived God's Eye View upon reality The difficulty here is that the imposed criteria for giving meaning value and purpose to human life have no place for what the stigmatized Other adopts On the other hand pragmatism of a particular stripe establishes a naturalistic instead of the mathematical basis for our understanding of human life Naturalism counsels that human beings should situate

themselves directly in the midst of what constitutes their sense of life with experience providing the bases for all the related determinations Experience draws upon conditions of flux and uncertainty as the basis of human life To adhere to the God s Eye View is to make human beings into desiccated calculating machines This book is located in the heart of this tension Programmatically it deconstructs the rationalism modern liberalism combine and constructs its replacement in pragmatism complemented by phronesis as carriers of this alternative mode of thought Consequential change emerges a modern liberal world of fixity in social relations mathematically derived is displaced by one characterized by intersubjective relations where lived experience forms its scientific and philosophical bases The Ancients figure prominently in this book as it is shaped around the central idea that the emancipation of the stigmatized Other is occurring in the context of perhaps the first engagement between the Platonic and the Protagorean Sophistic confrontation which lies at the heart of early Greek thought
