Medicus, 1975 **The Fearful Mind** Alby Elias, 2025-09-09 Fear is a universal emotion and is typically depicted as a despicable one While fear is regarded as nature s imperfect wisdom often undesirable and a sign of weakness its role in maintaining human life is overlooked In the middle of ubiquitous repulsion against fear there is minuscule literature on the beneficial effects of fear and the consequences of fearlessness Recent research has thrown light into the unconscious processing of fear In sharp contrast to the existing literature this book argues that fear overriding all other emotions operates relentlessly in the unconscious mind as a motivating force and renders life compatible with survival Fear appeals can bring healthy behavioral changes the stronger the appeal the more persuasive it is Moderate anxiety can improve performance that involves dominant responses Social anxiety is regarded as the root cause of conscientiousness This hypothesis is supported by the latest research that reveals impaired fear processing in patients with psychopathy a condition that is associated with crimes This book expands the concept of eustress a positive reaction to stress and describes the beneficial aspects of fear The book gives a twist to the conventional view of fear as an unwanted emotion and draws a new hypothesis that fear is the primary emotion and a constant psychological operative a lack of which poses dangerous consequences pHealth 2019 Mauro Giacomini, 2019-05-15 Smart mobile systems like micro systems smart textiles and implants and sensor controlled medical devices together with related networks and cloud services are important enablers for

telemedicine and pervasive health to become the next generation of health services Social media and gamification have added further to pHealth as an ecosystem This book presents the proceedings of pHealth 2019 the 16th in a series of international conferences on personalized health held in Genoa Italy from 10-12 June 2019 The book includes 1 keynote 2 of 4 invited talks 36 oral presentations and 7 poster presentations from a total of 141 international authors All submissions were critically reviewed by at least two independent experts and a member of the Scientific Program Committee This process resulted in a full paper rejection rate of more than 30% Besides wearable or implantable micro and nano technologies for personalized medicine this volume addresses topics such as legal ethical social and organizational requirements and impacts as well as necessary basic research for enabling future proof care paradigms Such participatory predictive personalized preventive and effective care settings combine medical services and public health prevention social and elderly care but also wellness and personal fitness The multilateral benefits of pHealth technologies for all stakeholder communities offer enormous potential for the improvement of both care quality and industrial competitiveness and also for the management of health care costs Hence the book will be of interest to all those involved in the provision of healthcare
