Practice-Oriented Online Marketing Ralf T. Kreutzer, Sonja Klose, 2025-11-29. People now spend a great deal of time online. Companies are following them onto the internet both in B2B and B2C contexts. This book answers the most important questions related to this development and presents concrete solution concepts, success strategies and numerous checklists from designing a cross-channel customer journey to controlling and considering legal frameworks. It provides companies with the tools they need to manage their online marketing budgets effectively and efficiently. In the 5th edition, Ralf T. Kreutzer together with new co-author Sonja Klose has incorporated key innovations in the online world. These include integration of current developments in the field of artificial intelligence across all relevant areas, revision and expansion of strategic options in online marketing, incorporation of current developments in online advertising, inclusion of new search engine optimization, SEO concepts and exploration of further aspects of email marketing. The 5th edition by Ralf T. Kreutzer and Sonja Klose impressively demonstrates how dynamically marketing is evolving. In addition to the new legal frameworks, the use of artificial intelligence in online marketing has also been comprehensively integrated. This makes the book an essential and up-to-date resource for both marketing students and professionals in the industry. A clear recommendation.

Martin Nitsche, President of the DDV German Dialogue Marketing Association. *Airline Industry* Nawal K. Taneja, 2016-06-23. Many business sectors have been and are being forced to compete with new competitors, disrupters of some sort, who have found new ways to create and deliver new value for customers, often through the use of technology that is coupled with a new underlying production or business model and/or a broad array of partners, including in some cases customers themselves. Think about the disruption created by Apple by the introduction of the iPod and iTunes and by Netflix within the entertainment sectors, using partners within the ecosystem. Think of Uber that didn't build an app around the taxi business but rather built a mobility business around the app to improve customer experience. The airline industry considers whether the airline industry is poised for disruptive innovations from inside or outside of the industry. Although airlines have a long history of continuous improvements and innovation, few of their innovations can be classified as disruptive innovations. The few disruptive innovations that did emerge were facilitated, for example, by new technology, jet aircraft and government policy deregulation. Now there are new forces in play: customers who expect to receive products that are more personalized and experience-based throughout the entire journey; new customer interfaces via social media; advanced information systems and analytics; financially powerful airlines based in emerging nations; and the rise of unencumbered entrepreneurs who think
