This volume is dedicated to Dov Gabbay who celebrated his 50 birthday in October 1995. Dov is one of the most outstanding and most productive researchers we have ever met. He has exerted a profound influence in major fields of logic, linguistics and computer science. His contributions in the areas of logic, language and reasoning are so numerous that a comprehensive survey would already fill half of this book. Instead of summarizing his work, we decided to let him speak for himself. Sitting in a car on the way to Amsterdam airport, he gave an interview to Jelle Gerbrandy and Anne Marie Mineur. This recorded conversation with him, which is included, gives a deep insight into his motivations and into his view of the world, the Almighty and of course the role of logic. In addition, this volume contains a partially annotated bibliography of his main papers and books. The length of the bibliography and the broadness of the topics covered there speak for itself.
