A.I. Artificial intelligence, introduction to the issues and current trends Pavel Bartoš,2023-01-01 Artificial Intelligence AI often referred to by the acronym Artificial Intelligence is a fascinating and dynamically developing field that has far reaching implications for various sectors of human activity At its core it is the simulation of human intelligence in computer systems AI is capable of learning planning problem solving speech recognition visual perception and many other cognitive functions that were previously considered the exclusive domain of human thought *Artificial Intelligence in HCI* Helmut Degen,Stavroula Ntoa,2024-05-31 The three volume book set LNAI 14734 14735 and 14736 constitutes the refereed proceedings of 5th International Conference on Artificial Intelligence in HCI AI HCI 2024 held as part of the 26th International Conference HCI International 2024 which took place in Washington DC USA during June 29 July 4 2024 The total of 1271 papers and 309 posters included in the HCII 2024 proceedings was carefully reviewed and selected from 5108 submissions The AI HCI 2024 proceedings were organized in the following topical sections Part I Human centered artificial intelligence explainability and transparency AI systems and frameworks in HCI Part II Ethical considerations and trust in AI enhancing user experience through AI driven technologies AI in industry and operations Part III Large language models for enhanced interaction advancing human robot interaction through AI AI applications for social impact and human wellbeing

Creative Convergence James Hutson,Jason Lively,Bryan Robertson,Peter Cotroneo,Martin Lang,2023-11-14 Embark on a journey that transcends the boundaries of art and technology in the groundbreaking realm of Creative Convergence The AI Renaissance in Art and Design This isn't just another book on art and technology it's a journey that sparks curiosity fuels innovation and challenges traditional artistic boundaries Discover the power of generative Artificial Intelligence AI as it melds with human expression propelling artistry into uncharted territories and redefining traditional notions of both originality and creativity The text is not just about art or AI it is about the fusion of both catalyzing a creative revolution that challenges previous assumptions about human machine collaboration and how ideation conceptualization process and execution are radically rethought Have you ever wondered how will AI revolutionize training education and execution in art and design Delve into this captivating treatment that contextualizes the disruptions we are experiencing today in the technological innovations and artistic responses and integrations of the past five hundred years Human creativity has always struggled against technological advance but ultimately integrated and redefined what art is in each era As such you will see how AI can be incorporated in various artistic disciplines in this study Explore real world case studies that showcase AI's practical impact on 3D design drawing digital art and even web design The book also addresses the controversial question Can AI be a co creator in the creative and artistic process even assisting in creating an original signature style Brace yourself for revelations that will challenge your perceptions of traditional artistry *Innovation and Technologies for the Digital Transformation of Education* Francisco José García-Peñalvo,María Luisa Sein-Echaluce,Ángel Fidalgo-Blanco,2024-06-06 This

book provides a critical overview of the current use of learning technologies for educational innovation and examines global trends in educational innovation It also shares experiences in educational innovation with learning technologies in Europe and Latin America Despite increasing concerns about the use of technology in education this book discusses how these can be addressed by focusing on fundamental principles such as personalization collaboration engagement accessibility and professional development

Proceedings of 4th International Conference on Artificial Intelligence and Smart Energy S. Manoharan,Alexandru Tugui,Zubair Baig,2024-06-07 This book presents a comprehensive collection of research chapters focusing on innovative solutions to energy and sustainability challenges It reflects the collaborative efforts of researchers worldwide showcasing novel approaches to complex problems Topics discussed range from securing cyber physical systems to revolutionizing healthcare with AI and robotics emphasizing sustainable research The book emphasizes smart and sustainable energy solutions highlighting advancements in solar panel efficiency fault analysis and fuzzy controlled converters for grid tied photovoltaic systems Additionally it explores AI s transformative potential in water solutions agriculture and renewable energy technologies across domains like smart cities transportation and healthcare The insights shared aim to inspire further research foster discussions and drive real world impact toward a resilient inclusive and sustainable future Discusses issues and offers sustainable solutions to meet the challenges faced by today s economy and industry Presents recent research in the sustainable transformation of engineering and technological systems Serves as a valuable resource for both academic researchers and industry practitioners interested in Artificial Intelligence AI and smart energy sectors

Diffusions in Architecture: Artificial Intelligence and Image Generators Matias del Campo,2024-02-28

DIFFUSIONS IN ARCHITECTURE A guide to diffusion models and their impact on design with insight on how this novel artificial intelligence technology may disrupt the industry *Diffusions in Architecture Artificial Intelligence and Image Generators* delves into the impact of Generative AI models and their effect on architecture design and aesthetics The book presents an in depth analysis of how these new technologies are revolutionizing the field of architecture and changing the way architects approach their work The architects presented in the book focus on the application of specific AI techniques and tools used in generative design such as Diffusion models Dall E2 Stable Diffusion and MidJourney It discusses how these techniques can generate synthetic images that are both realistic and imaginative creating new possibilities for architectural design and aesthetics Twenty two leading designers and theorists offer their insights providing disciplinary depth by covering the full impact of these learning tools on architecture

Architecture Matias del Campo, 2024-05-13 Artificial intelligence AI applications in architectural design have achieved a critical mass and exploded into the mainstream of architectural imaginations From practical applications in design and construction to the implications for architectural theory to a plethora of novel tools for accelerated morphological studies what has become clear is that the discipline is passing a threshold that fundamentally changes architecture as a whole However the most radical change is the interrogation and novel discussion of authorship and agency in design ecologies driven by synthetic imaginations What does it mean for authorship when more than 50 per cent of the content is generated by a nonhuman player This issue seems more pressing than ever In a world that is being transformed by AI on a daily basis what is the role of the sole genius and designers artists and architects This AD dives deep into current discussions about the human position in architectural design which is increasingly entangled in an AI driven design context Contributors Cesare Battelli Phil Bernstein Mario Carpo Benjamin Ennemoser and Ingrid Mayrhofer Hufnagl Sarah Fox Wanyu He Andrew Kudless Ryan Vincent Manning Sandra Manninger Kyle Steinfeld Andrew Witt and Michael Young *Ai Weiwei* Weiwei Ai, Urs Meile, 2007 Surveys the career of twentieth century Chinese artist Ai Weiwei and includes photographs of his sculptures and installations Artificial Intelligence Planning Systems James A. Grenander, 1993 The aim of pattern theory is to create mathematical knowledge representations of complex systems analyse the mathematical properties of the resulting regular structures and to apply them to practically occurring patterns in nature and the man made world Starting from an algebraic formulation of such representations they are studied in terms of their topological dynamical and probabilistic aspects Patterns are expressed through their typical behaviour as well as through their variability around their typical form Employing the representations regular structures algorithms are derived for the understanding recognition and restoration of observed patterns The algorithms are investigated through computer experiments
